**QUESTION 1**

Universal containers (UC) has a mobile application that it wants to deploy to all of its salesforce users, including customer Community users. UC would like to minimize the administration overhead, which two items should an architect recommend? Choose 2 answers

- A. Enable the "Refresh Tokens is valid until revoked " setting in the Connected App.
- B. Enable the "Enforce Ip restrictions" settings in the connected App.
- C. Enable the "All users may self-authorize" setting in the Connected App.
- D. Enable the "High Assurance session required" setting in the Connected App.

Correct Answer: AC

QUESTION 2

Containers (UC) has an existing Customer Community. UC wants to expand the self- registration capabilities such that customers receive a different community experience based on the data they provide during the registration process. What is the recommended approach an Architect Should recommend to UC?

- A. Create an After Insert Apex trigger on the user object to assign specific custom permissions.
- B. Create separate login flows corresponding to the different community user personas.
- C. Modify the Community pages to utilize specific fields on the User and Contact records.
- D. Modify the existing Communities registration controller to assign different profiles.

Correct Answer: C

QUESTION 3

In an SP-Initiated SAML SSO setup where the user tries to access a resource on the Service Provider, What HTTP param should be used when submitting a SAML Request to the Idp to ensure the user is returned to the intended resource after authentication?

- A. RedirectURL
- B. RelayState
- C. DisplayState
- D. StartURL

Correct Answer: B

QUESTION 4

Universal Containers (UC) has decided to use Salesforce as an Identity Provider for multiple external applications. UC wants to use the Salesforce App Launcher to control the Apps that are available to individual users. Which three steps are required to make this happen?

- A. Add each connected App to the App Launcher with a Start URL.
- B. Set up an Auth Provider for each External Application.
- C. Set up Salesforce as a SAML Idp with My Domain.
- D. Set up Identity Connect to Synchronize user data.
- E. Create a Connected App for each external application.

Correct Answer: ACE

QUESTION 5

An identity architect has been asked to recommend a solution that allows administrators to configure personalized alert messages to users before they land on the Experience Cloud site (formerly known as Community) homepage.

What is recommended to fulfill this requirement with the least amount of customization?

- A. Customize the registration handler Apex class to create a routing logic navigating to different home pages based on the user profile.
- B. Use Login Flows to add a screen that shows personalized alerts.
- C. Build a Lightning web Component (LWC) for a homepage that shows custom alerts.
- D. Create custom metadata that stores user alerts and use a LWC to display alerts.

Correct Answer: B
