**QUESTION 1**

Universal containers (UC) is concerned that having a self-registration page will provide a means for "bots" or unintended audiences to create user records, thereby consuming licences and adding dirty data. Which two actions should UC take to prevent unauthorised form submissions during the self-registration process? Choose 2 answers

- A. Use open-ended security questions and complex password requirements
- B. Primarily use lookup and picklist fields on the self registration page.
- C. Require a captcha at the end of the self-registration process.
- D. Use hidden fields populated via java script events in the self-registration page.

Correct Answer: CD

QUESTION 2

Universal Containers (UC) built an integration for their employees to post, view, and vote for ideas in Salesforce from an internal Company portal. When ideas are posted in Salesforce, links to the ideas are created in the company portal pages as part of the integration process. The Company portal connects to Salesforce using OAuth. Everything is working fine, except when users click on links to existing ideas, they are always taken to the Ideas home page rather than the specific idea, after authorization. Which OAuth URL parameter can be used to retain the original requested page so that a user can be redirected correctly after OAuth authorization?

- A. Redirect_uri
- B. State
- C. Scope
- D. Callback_uri

Correct Answer: A

QUESTION 3

How should an Architect automatically redirect users to the login page of the external Identity provider when using an SP-Initiated SAML flow with Salesforce as a Service Provider?

- A. Use visualforce as the landing page for My Domain to redirect users to the Identity Provider login Page.
- B. Enable the Redirect to the Identity Provider setting under Authentication Services on the My domain Configuration.
- C. Remove the Login page from the list of Authentication Services on the My Domain configuration.
- D. Set the Identity Provider as default and enable the Redirect to the Identity Provider setting on the SAML Configuration.

Correct Answer: C

**QUESTION 4**

Universal Containers (UC) has an Experience Cloud site (Customer Community) where customers can authenticate and place orders, view the status of orders, etc. UC allows guest checkout.

How can a guest register using data previously collected during order placement?

- A. Enable Security Assertion Markup Language Sign-On and use a login flow to collect only order details to retrieve customer data.
- B. Enable Facebook as an authentication provider and use a registration handler to collect only order details to retrieve customer data.
- C. Use a Connected App Handler Apex Plugin class to collect only order details to retrieve customer data.
- D. Enable self-registration and customize a self-registration page to collect only order details to retrieve customer data.

Correct Answer: D

QUESTION 5

Containers (UC) has implemented SAML-based single Sign-on for their Salesforce application and is planning to provide access to Salesforce on mobile devices using the Salesforce1 mobile app. UC wants to ensure that Single Sign-on is used for accessing the Salesforce1 mobile App. Which two recommendations should the Architect make? Choose 2 Answers

- A. Configure the Embedded Web Browser to use My Domain URL.
- B. Configure the Salesforce1 App to use the MY Domain URL.
- C. Use the existing SAML-SSO flow along with User Agent Flow.
- D. Use the existing SAML SSO flow along with Web Server Flow.

Correct Answer: BC
