Following Questions and Answers are all new published by Salesforce
Official Exam Center

QUESTION 1

What are two considerations to make when performing SOAP callouts from within Apex?

Choose 2 answers

A. SOAP callouts consume API limits.

B. WSDL2Apex supports RPC-style SOAP callouts.

C. WSDL2Apex can be used to generate stub code.

D. SOAP callouts cannot occur after any DML statements.

Correct Answer: CD

QUESTION 2

A company is planning on sending orders from Salesforce to a fulfillment system. The integration architect has been asked to plan for the integration. Which two questions should the integration architect consider? Choose 2 answers

A. Can the fulfillment system create new addresses within the Order Create service?

B. Can the fulfillment system make a callback into Salesforce?

C. Can the fulfillment system implement a contract-first Outbound Messaging interface?

D. Is the product catalog data identical at all times in both systems?

Correct Answer: BC

QUESTION 3

Northern Trail Outfitters\\' ERP is integrated with Salesforce and syncs several million contacts per day. To prevent specific data from syncing, the integration uses a SOQL query filtered by sharing hierarchy.

Which two things should an architect do to improve the performance of the integration? Choose 2 answers

A. Include non-selective criteria in query filters.

B. Remove the query filters.

C. Include selective criteria in query filters.

D. Remove the sharing restrictions.

Correct Answer: CD

QUESTION 4

Northern Trail Outfitters (NTO) has recently implemented middleware for orchestration of services across platforms. The ERP system being used requires transactions be captured near real time at a REST endpoint initiated in Salesforce when creating an order object. Additionally, the Salesforce team has limited development resources and requires a low code solution.

Which two options will fulfill the use case requirements? Choose 2 answers

A. Use Remote Process Invocation fire and forget pattern on insert on the order object using Flow Builder.

B. Implement a Workflow Rule with Outbound Messaging to send SOAP messages to the designated endpoint.

C. Implement Change Data Capture on the order object and leverage the replay Id in the middleware solution.

D. Use a process builder to create a Platform Event, selecting the record type as the Platform Event Name on insert of record.

Correct Answer: AC

QUESTION 5

Universal Containers is implementing Salesforce, including a new business process for order management. All Opportunities that reach the Close -Won stage need to be sent to an order management system. When this Opportunity is marked as Complete, a record must be created in their billing system. After the bill is processed, their billing system will be marked as Paid. Each status change from each system must be reflected in Salesforce so call center agents can answer questions about the status of a customer order. All system administrators have agreed to use recent Production data to seed their test systems. What types of sandbox

should an Architect recommend end-to-end testing occur in? Choose 2 answers

A. Developer Pro Sandbox

B. Full Sandbox

C. Partial Copy Sandbox

D. Developer Org

Correct Answer: BC
