QUESTION 1

Universal Containers (UC) has an existing web-based application that a group of employees use on a regular basis. These employees often have Salesforce and the web-based application open and find themselves manually moving the data between both. UC would like the two systems to be integrated so that the employees will see all the data in one screen without the need for manually updating the data.

What integration pattern can help accomplish this requirement?

- A. Use the Force.com canvas framework to embed the external application into Salesforce.
- B. Use Streaming API to create a push topic to send the message to the external system asynchronously.
- C. Use Rest API to pull data from Salesforce and update the external application.

Correct Answer: A

QUESTION 2

Universal Containers would like to integrate Salesforce to their Accounting system. Salesforce must notify the accounting system for every new account that has been created. The security team will not allow Salesforce to integrate directly to the accounting system due to potential security issues.

Which three stages should the Architect consider to reduce the security concerns for this Integration use case?

Choose 3 answers

- A. Terminate the SSL connection at a reverse proxy in the DMZ which establishes trust in the connection using mutual SSL.
- B. Enable WS-security for the web services made between Salesforce and the accounting system.
- C. Whitelist the Salesforce IP range on the firewall to ensure only Salesforce- originated traffic can penetrate the network.
- D. Utilize an Enterprise Service Bus to ensure Accounting system credentials are not stored within Salesforce.
- E. Enable platform encryption in the Salesforce org to ensure network communication to the Accounting system is encrypted.

Correct Answer: BDE

QUESTION 3

What is the first thing an Integration Architect should validate if a callout from a Lightning Web Component to an external endpoint is failing?

- A. The endpoint domain has been added to Cross-Origin Resource Sharing.
- B. The endpoint URL has been added to Content Security Policies.

- C. The endpoint URL has added been to an outbound firewall rule.
- D. The endpoint URL has been added to Remote Site Settings.

Correct Answer: B

QUESTION 4

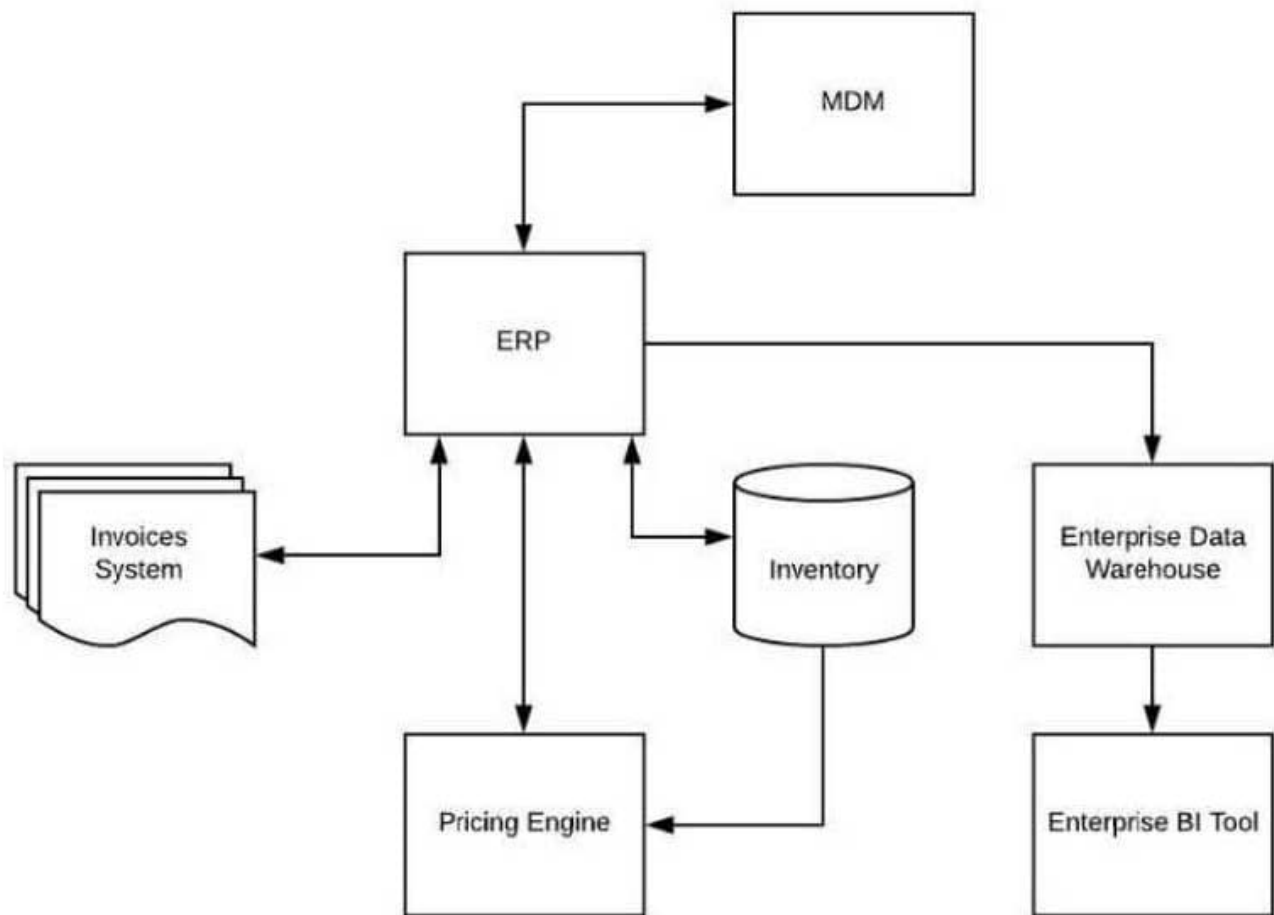

Which three considerations should an Integration Architect consider when recommending Platform Event as a Integration solution? Choose 3 answers

- A. Inability to query event messages using SOQL.
- B. Subscribe to an AssetToken Event stream to monitor OAuth 2.0 authentication activity.
- C. Inability to create a Lightning record page for platform events.
- D. When you delete an event definition, it's permanently removed and can't be restored.
- E. You can use Event Monitoring to track user activity, such as logins and running reports.

Correct Answer: ACD

QUESTION 5

A large enterprise customer with the following system landscape is planning to implement Salesforce Sales Cloud.

The following business processes need to be supported in Salesforce:

1.

Sales Consultants should be able to have access to current inventory.

2.

Enterprise Resource Planning System(ERP) is the system of record for pricing information.

3.

Quotes should be generated in Salesforce with pricing from ERP.

4.

Sales Management uses a Enterprise Business Intelligence (BI) tool to view Sales dashboards.

5.

Master Data Management (MDM) is the system of record for customers and prospects.

6.

Invoices should be accessible in Salesforce.

Which systems in the landscape should the Integration Consultant consider to be integrated with Salesforce to support the business requirements?

- A. ERP, Invoices system, Data Warehouse and BI Tool
- B. ERP, Inventory, Pricing Engine, Invoices system
- C. ERP, MDM, BI tool and Data Warehouse
- D. ERP, MDM, Data Warehouse, Invoices system

Correct Answer: B
