### QUESTION 1

Within system development, conflicts continually arise between stakeholders with regard to the requirements. As a requirements engineer, how do you handle conflicts in projects best? (1 Point)

- A. You resolve the conflict with the best resolution technique available to you.
- B. You analyze the conflict, try to bring about a solution with a suitable technique and document relevant information about the conflict.
- C. You ignore the conflict since this is a matter for project management.
- D. In order to resolve such conflicts you escalate them via the escalation paths defined in the project.

Correct Answer: B

### QUESTION 2

Evaluate the following guidelines as to whether they should or should not be adhered to when writing a requirements specification: (2 Points)

Adhere to	Not adhere to	
A	B	Minimize the number of headers in order to reduce the size of the document.
C	D	Only one requirement per sentence, no nesting of requirements.
E	F	Highlight legally binding requirements in italics
G	H	Use of a consistent terminology
I	J	Interesting and diverse style of writing
K	L	Use of sentence-templates for requirements formulation
M	N	Use of short sentences and paragraphs
O	P	Unknown terms furnished with references to Wikipedia

- A. A
- B. B
- C. C
- D. D
- E. E
- F. F
- G. G
- H. H

I. I

J. J

K. K

L. L

M. M

N. N

O. O

P. P

Correct Answer: BCFGJKMP

---

### QUESTION 3

You are project manager for a system that your company is creating for the military in the field of logistics. A requirements engineer has been assigned to your project but does not have all the desirable skills for this role. In respect to the attributes of the requirements engineer, which of the following statements implies the greatest risk for the requirements engineering? (1 Point)

- A. The requirements engineer is not familiar with the military ranks and so cannot deal adequately with the hierarchical sensitivities.
- B. The requirements engineer does not have detailed knowledge of the military norms and standards that should be applied to the system.
- C. The requirements engineer has no solid project management training.
- D. The requirements engineer is introverted and has no knowledge of requirements elicitation and documentation.

Correct Answer: D

---

### QUESTION 4

You are to create a requirements specification for an internet banking software. The system shall perform bank credit transfers and therefore receives from the user, among other information, the bank identification code and the name of the bank. Now things have changed so that only the bank identification code must be entered by the user and the bank name is no longer required. On which part of your documentation do you most likely have to work in order to incorporate this change? (2 Points)

- A. Nowhere, since this is a detail for the architecture.
- B. In the chapter in which the states of the system are described.
- C. As a change in the goals has been communicated, the goals in the specification must be updated.
- D. If it is about inputs and outputs of the system, this change has to be worked into the context diagram.

E. You have to adjust the class model and/or the data model, which describe the structure of the system's input and output data.

Correct Answer: CD

---

#### QUESTION 5

For an interview, you have prepared a use case diagram for the system to be specified. You decide to talk through a use case in detail with the stakeholder. You receive very useful feedback which must now be documented. Which of the following means of expression is least suitable to document the details of a single use case? (1 Point)

- A. State diagram
- B. Activity diagram
- C. Natural language
- D. Context diagram
- E. Class diagram

Correct Answer: D
