- ⚙️ **800,000+** Satisfied Customers

**QUESTION 1**

Which of the following RAID levels should an Intel Server Specialist recommend to a customer who must have the highest reliability available, but only has room for four hard drives?

- A. RAID 1
- B. RAID 5
- C. RAID 6
- D. RAID 10

Correct Answer: C

---

**QUESTION 2**

Your customer wishes to consolidate a number of their current servers in their business, so virtualization will be required. In addition they have asked for information on the cloud; so you will need to specify a system (as their Intel Server Specialist) which will accommodate this eventuality; and give advice on the type of cloud they should go for, as well as configure a server that can handle this level of abstraction. They currently have 7 servers to be consolidated along with their switched infrastructure. Your first task will be to suggest the best server platform. Which of the following will you suggest, given the requirement for the highest number of add-in cards in the server?

- A. Intel Server Board HNS2600KP
- B. Intel Server System R2224WTTYS
- C. Intel Server Board S2600CWT
- D. Intel Server Board S1200V3RP
- E. Intel Server System R1208GZ4GSN

Correct Answer: B

---

**QUESTION 3**

An Intel Server Board S2600WT2 has been assembled and powered on; however, the status LED on the front panel blinks with an amber colour which means a non-critical alert has occurred. Which of the following might be the BEST way to find the reason for this alert?

- A. Listen to beep code and look for it in TPS.
- B. Look up ERROR MANAGER in the BIOS.
- C. View POST LED code and look for it in TPS.
- D. View the SEL log.

Correct Answer: D

---

**QUESTION 4**

Your customer is involved in planning a new compact data centre. Some of the critical features that need to be considered in such a data centre include heat and energy dissipation. This means they must know the power draw of the servers they plan to configure. What is the maximum number and speed of DIMMs that can be accommodated in the S1200V3RP in a 1U chassis? Please choose your correct answer from the list below:

- A. 2DIMM slots at 1333 MT/s (ECC) RDIMMs
- B. 4DIMM slots at 1333 MT/s (ECC) RDIMMs
- C. 8DIMM slots at 1333 MT/s (ECC) RDIMMs
- D. 2DIMM slots at 1600 MT/s (ECC) UDIMMs
- E. 4DIMM slots at 1600 MT/s (ECC) UDIMMs

Correct Answer: E

---

**QUESTION 5**

How does Intel Trusted Execution Technology promote increased server security? (Select ALL that apply).

- A. Assists in detecting and/or preventing BIOS and firmware update attacks
- B. Assists in detecting and/or preventing reset attacks designed to compromise platform secrets in memory
- C. Assists in detecting and/or preventing non-trusted VMM (rootkit hypervisor)
- D. Provides encryption support to instructions currently being executed
- E. Provides enhanced pipeline protection for threads awaiting execution
- F. Supports the Intel Instant Secure Erase feature

Correct Answer: ABC
