QUESTION 1

As an Intel® Server Specialist you have been asked to advise your customer about the benefits of RAID; in particular to explain the differences when comparing hardware RAID over software RAID.

How would you answer from the list below? (Select ALL that apply).

- A. Nonvolatile
- B. It has dedicated resources
- C. Write-back capability, protected by BBU
- D. It has a faster connection speed to storage
- E. Additional RAID levels are available

Correct Answer: BCE

QUESTION 2

Why is it important to update the system BIOS when building a new server?

- A. Updating the BIOS causes the fan speed control to be set correctly for a chassis.
- B. Updating the BIOS configures the BMC settings for remote access.
- C. Updating the BIOS implements the latest updates and fixes for a system.
- D. Updating the BIOS ensures the BMC and HSC have a clear communication path.

Correct Answer: C

QUESTION 3

Which of the following is a function of the BIOS Recovery Boot feature?

- A. BIOS recovery boot can be used to apply a BIOS version to a system that has a corrupt BIOS.
- B. BIOS recovery boot is the recommended approach to reset any BIOS passwords.
- C. BIOS recovery boot is always used as part of the BIOS update process.
- D. BIOS recovery boot can be used to recover the BIOS settings from the last known good configuration of the system.

Correct Answer: A

QUESTION 4

Your customer is competing in a Government Tender which specifies Infiniband?modules. Which of the following list of boards can support Infiniband?I/O Modules such as the AXX1FDRIBIOM? (Select ALL that apply).

- A. Intel Server Board S2600CW
- B. Intel Server Board S1200V3RP
- C. Intel Server Board S2600KP
- D. Intel Server Board S1200V5SP
- E. Intel Server Board S2600WT

Correct Answer: CE

QUESTION 5

As the Intel® Server Specialist you have an urgent customer call (their customer is still on the phone to them!) complaining that the new server installation is "not working properly!" The Intel® RAID controller RS25PB080 is installed in the Intel® Server System R2208WT2YS. As you complete your troubleshooting "discovery" with your customer, you find that the Intel® RAID Controller is installed in Riser slot 2 and that the controller is not visible either in BIOS or in the OS. How should you advise your customer to proceed?

- A. Ensure that a second CPU is installed
- B. Ensure that the additional six pin power connector is correctly installed
- C. This is a PCIe gen3 device and must be configured accordingly
- D. The RAID activation key should be installed
- E. The RAID device should be enabled in BIOS
- F. Upgrade to the latest BIOS

Correct Answer: A
