### QUESTION 1

Drag and drop the correct protocol to its default port.

Select and Place:

FTP	<input type="text"/>	161
Telnet	<input type="text"/>	22
SMTP	<input type="text"/>	21
SNMP	<input type="text"/>	69
SCP	<input type="text"/>	25
TFTP	<input type="text"/>	23

Correct Answer:

FTP	21
Telnet	23
SMTP	25
SNMP	161
SCP	22
TFTP	69

## QUESTION 2

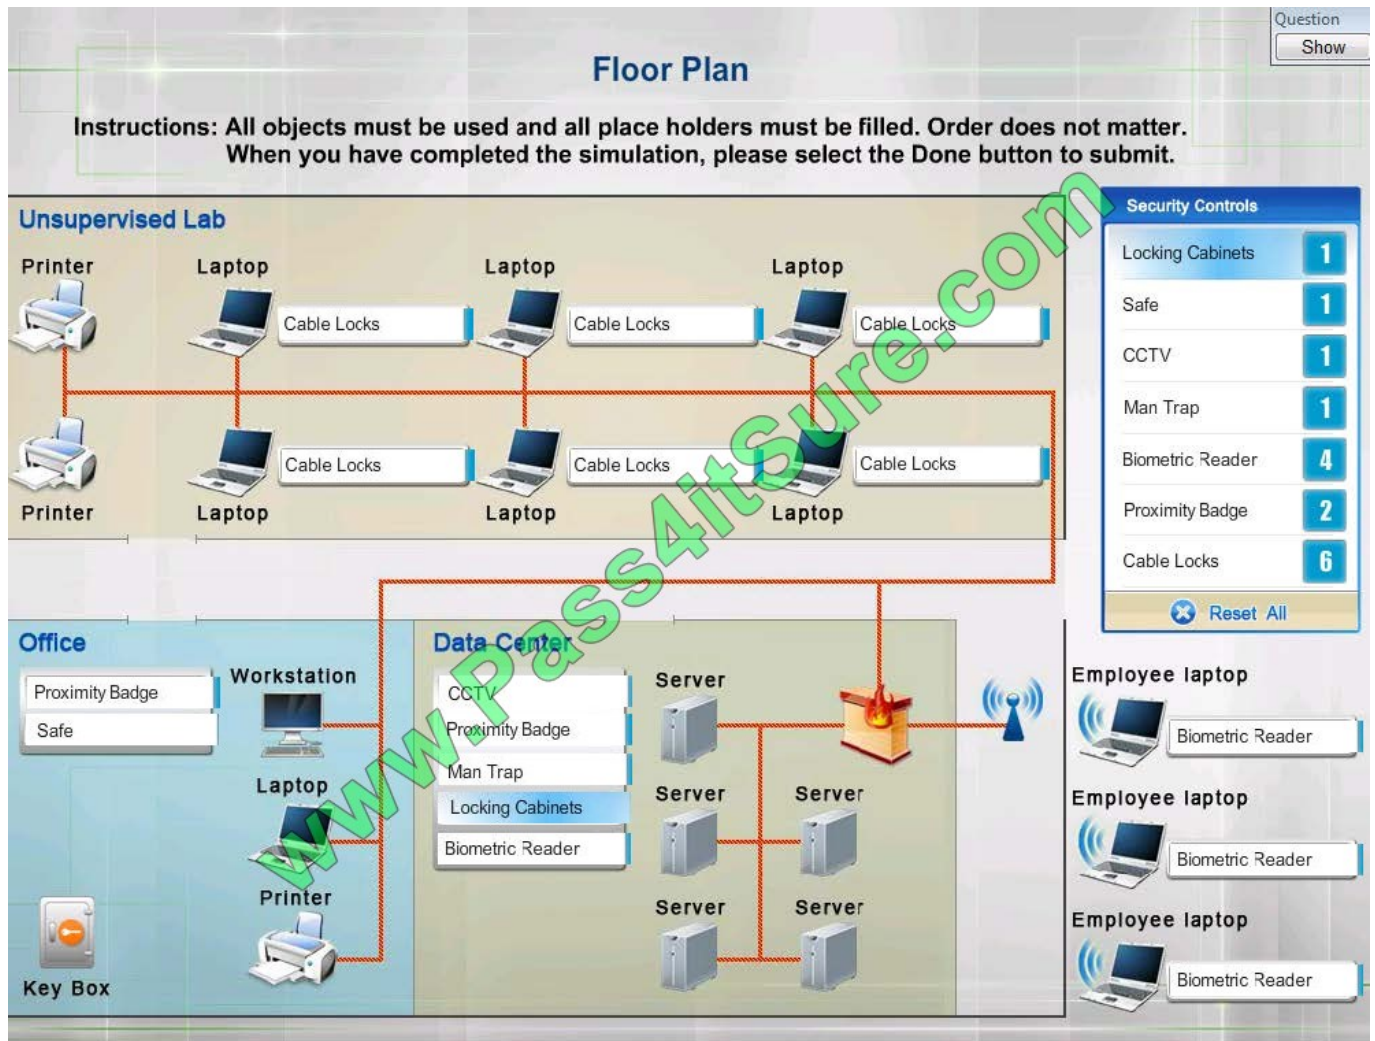

You have been tasked with designing a security plan for your company. Drag and drop the appropriate security controls on the floor plan-Instructions: All objects must be used and all place holders must be filled Order does not matter When you have completed the simulation, please select the Done button to submit.

Select and Place:

Correct Answer:

### QUESTION 3

The security administrator has installed a new firewall which implements an implicit DENY policy by default Click on the firewall and configure it to allow ONLY the following communication.

1. The Accounting workstation can ONLY access the web server on the public network over the default HTTPS port. The accounting workstation should not access other networks.
2. The HR workstation should be restricted to communicate with the Financial server ONLY, over the default SCP port.
3. The Admin workstation should ONLY be able to access the servers on the secure network over the default TFTP port.

Instructions: The firewall will process the rules in a top-down manner in order as a first match The port number must be typed in and only one port number can be entered per rule Type ANY for all ports. The original firewall configuration can be reset at any time by pressing the reset button. Once you have met the simulation requirements, click save and then Done to submit.

**QUESTION 4**

You are the security administrator. You need to determine the types of security. Drag the items “Types of Security” to appropriate Security devices.

**Configure the Firewall**

Task: Configure the firewall (fill out the table) to allow these four rules:

1. Only allow the Accounting computer to have HTTPS access to the Administrative server.
2. Only allow the HR computer to be able to communicate with the Server 2 System over SCP.
3. Allow the IT computer to have access to both the Administrative Server 1 and Administrative Server 2

Correct Answer: Use the following answer for this simulation task.

Explanation/Reference:

Source IP	Destination IP	Port number	TCP/UDP	Allow Deny
10.4.255.10	10.4.255.101	443	TCP	Allow
10.4.255.10	10.4.255.2	22	TCP	Allow
10.4.255.10	10.4.255.101	Any	Any	Allow
10.4.255.10	10.4.255.102	Any	Any	Allow

Note: All servers in the bottom have the same IP address, so something is wrong with this question.

**QUESTION 5**

A Security administrator wants to implement strong security on the company smart phones and terminal servers located in the data center. Drag and Drop the applicable controls to each asset type. Instructions: Controls can be used multiple times and not all placeholders needs to be filled. When you have completed the simulation, Please select Done to submit.

Select and Place:

Controls	Company Manager Smart Phone	Data Center Terminal Server
Screen Locks		
Strong Password		
Device Encryption		
Remote Wipe		
GPS Tracking		
Pop-up Blocker		
Cable Locks		
Antivirus		
Host Based Firewall		
Proximity Reader		
Sniffer		
Mantrap		

Correct Answer:

Controls	Company Manager Smart Phone	Data Center Terminal Server
		
	Scerren Locks	Cable Locks
	Strong Password	Antivirus
	Device Encryption	Host Based Firewall
	Remote Wipe	Sniffer
	GPS Tracking	Mantor ap
Proximity Reader	Pop-up Blocker
