### QUESTION 1

What is the purpose of the discard action of a firewall filter?

- A. The system drops the packet and logs the entry.
- B. The system drops the packet and sends an ICMP message.
- C. The system silently drops the packet.
- D. The system evaluates the next term in the policy.

Correct Answer: C

---

### QUESTION 2

Which two statements about the configure exclusive command are correct? (Choose two.)

- A. The command excludes other users from editing the configuration.
- B. The command retains all uncommitted changes when exiting exclusive mode
- C. The command causes the loss of all uncommitted changes when exiting exclusive mode
- D. The command allows multiple users to edit private copies of the configuration concurrently.

Correct Answer: CD

---

### QUESTION 3

Click the Exhibit button.

**Exhibit**

```
[edit policy-options]
user@router# show
prefix-list rfc1918 {
    10.0.0.0/8;
    172.16.0.0/12;
    192.168.0.0/16;
}
policy-statement BGP-import-policy {
    term term-1 {
        from {
            route-filter 172.16.0.0/12 orlonger;
            route-filter 10.10.0.0/16 orlonger;
        }
        then accept;
    }
    term term-2 {
        from {
            prefix-list-filter rfc1918 orlonger reject;
        }
    }
}
```

You have applied the policy shown in the exhibit as an import policy to your BGP group. In this scenario, what will happen when the router receives the 192.168.30.48/32 route?

- A. It will be sent to the default BGP policy
- B. It will match term-1 and be accepted.
- C. It will match term-2 and be accepted
- D. It will match term-2 and be rejected.

Correct Answer: D

**QUESTION 4**

Which statement is true about using custom login class permissions?

- A. If you allow and deny the same command, the command is allowed
- B. If you allow and deny the same command, the command is denied.

C. If you allow and deny the same command, Junos OS will randomly choose the action

D. If you allow and deny the same command, the Junos OS will fail the commit check.

Correct Answer: A

Understanding the Allow and Deny Statement Precedence and Matching By default, the allow-commands and allow-configuration regular expressions take precedence over deny-commands and deny-configuration expressions. Thus, if you

configure the same command for both the allow-commands and deny-commands statements, then the allow operation takes precedence over the deny operation.
