**QUESTION 1**

Which statement describes a data center?

- A. The data center locally hosts thousands of users with wired connections, all with three to four active devices.
- B. The data center typically involves high density topologies with multiple points of access.
- C. The data center encompasses a broad area that is used to interconnect business locations and resources.
- D. The data center houses the computing resources and services used by a company.

Correct Answer: D

---

**QUESTION 2**

You are asked to examine the infrastructure requirements needed to provision a new network build in support of a customer who wants to take advantage of their service provider's MPLS/VPN offering.

Which three considerations would be relevant to this work? (Choose three.)

- A. supplicant roles in the current network layout
- B. server hypervisor and host OS selection
- C. backdoor connectivity requirements
- D. IGP protocols deployed in the customer environment
- E. site-to-site versus site-to-hub communications

Correct Answer: CDE

---

**QUESTION 3**

A local university has decided to expand their research capabilities and build a new research facility. You have been hired to design and install the new network in this building. The research team expects to generate massive amounts of data, which must be shared with other facilities located on the same campus. Physical access to the building is restricted, and the connection to the other buildings is private and direct.

What is your primary concern in the design of the network?

- A. resiliency
- B. security
- C. encryption
- D. scalability

Correct Answer: B

---

**QUESTION 4**

Your customer is experiencing problems with session drops and high response time. You are asked to provide redesign suggestions to minimize these problems. You examine the applications that are supported by your customer's network to try to identify problem factors.

Which two factors are important from an application-driven network impact perspective? (Choose two.)

- A. presence of elephant flows
- B. IGP protocols in use
- C. use of HTTPS protocols by the application
- D. short timers

Correct Answer: AD

---

**QUESTION 5**

Your customer is a growing enterprise with limited capital to invest in network expansions. They have noticed performance problems in their campus LAN, which have been traced back to a high oversubscription ratio between the aggregation and core layers. The customer's aggregation and core switches are connected using a single 1GbE connection.

Which solution improves network performance?

- A. Add additional 1GbE connections between the aggregation and core layers with LACP.
- B. Add additional 1GbE connections between the aggregation and core layers with MACsec.
- C. Add additional 1GbE connections between the aggregation and core layers with PNAC.
- D. Add additional 1GbE connections between the aggregation and core layers with LLDP.

Correct Answer: A
