QUESTION 1

How are user role-mapping rules processed by the Junos Pulse Secure Access Service gateway?

A. All rules are processed in a top-down fashion for the best match. If no match is found, the user is not allowed to sign in to the realm.

B. All rules are processed in a top-down fashion for the best match. If no match is found, the user is assigned to the default role.

C. All rules are processed in a top-down fashion for all eligible matches. If no match is found, the user is not allowed to sign into the realm.

D. All rules are processed in a top-down fashion for all eligible matches. If no match is found, the user is assigned to the default role.

Correct Answer: C

QUESTION 2

What are two operational capabilities of the Secure Application Manager client? (Choose two.)

A. Automatically launches the client upon user browser initiated login.

B. Controls access policy to network subnets and servers.

C. Forces Java JRE update on SAM client installation.

D. Restricts use of machine COM ports.

Correct Answer: AB

QUESTION 3
