**QUESTION 1**

You want to use Host Checker to verify that users have a specific version of application software. Which two Host Checker rules in the Admin UI would achieve this? (Choose two.)

- A. Predefined Rule. OS Checks
- B. Custom Rule. Patch Assessment
- C. Custom Rule. Registry Setting
- D. Custom Rule. NetBIOS

Correct Answer: BC

QUESTION 2

You have just upgraded the Junos Pulse Secure Access Service, but now Host Checker is not operational. Host Checker functioned normally before the upgrade. Which Host Checker setting should you verify is enabled in the Admin UI?

- A. Perform dynamic policy reevaluation
- B. Endpoint Security Assessment Plug-In (ESAP) versions
- C. Auto-update virus signatures list
- D. Auto-upgrade Host Checker

Correct Answer: D

QUESTION 3

Which statement accurately describes Host Checker?

- A. Host Checker is a clientless process that removes residual data, such as temporary files or application caches, left on a user's machine after a Pulse Secure Access session.
- B. Host Checker is a client-side agent that removes residual data, such as temporary files or application caches, left on a user's machine after a Pulse Secure Access session.
- C. Host Checker is a clientless process that performs endpoint health and security checks for hosts that attempt to connect to the Pulse Secure Access Service.
- D. Host Checker is a client-side agent that performs endpoint health and security checks for hosts that attempt to connect to the Pulse Secure Access Service.

Correct Answer: D

QUESTION 4

You want to sign in to the Admin UI from the external interface but cannot bring up the Web page.

The only configuration that has been accomplished are the network settings.

What must be configured for you to bring up the Admin UI?

- A. The IP address of your workstation must be added to the allow list.
- B. A new URL must be created for the Web page to be accessed on the external interface.
- C. The external interface must be enabled for admin access.
- D. You must create a new authentication server for this admin login page.

Correct Answer: C

QUESTION 5

Junos Pulse Collaboration meeting creators want to search for and invite other Secure Access Service users to meetings. Which two types of authentication servers would be used? (Choose two.)

- A. local authentication server
- B. AD/NT authentication server
- C. LDAP authentication server
- D. RADIUS authentication server

Correct Answer: AC
