**QUESTION 1**

Which platform supports the Junos Pulse Secure Access Service?

- A. MX Series
- B. SRX Series
- C. MAG Series
- D. EX Series

Correct Answer: A

QUESTION 2

Which two tasks would be performed during initial configuration of the Junos Pulse Secure Access Service? (Choose two.)

- A. Configure external interface.
- B. Create an administrator account.
- C. Create user accounts.
- D. Configure internal interface.

Correct Answer: BD

QUESTION 3

Users sign in to the Junos Pulse Secure Access Service using LDAP authentication. Users must also access Outlook Web Access using the same LDAP credentials. You would like to make this authentication process automatic so that users do not need to submit the same credentials twice.

In the Admin UI, which two will address this concern? (Choose two.)

- A. Kerberos
- B. Anonymous access
- C. Windows Terminal Services
- D. Remote form POST

Correct Answer: AD

**QUESTION 4**

A Junos Pulse Secure Access Service has a device certificate issued for sa.pulse.local. Users accessing sales.pulse.local and finance.pulse.local receive a certificate warning any time they access the Junos Pulse Secure Access Service. As an administrator, which two actions would resolve the issue? (Choose two.)

- A. Install a wildcard certificate for *.pulse.local.
- B. Remove the sa.pulse.local device certificate.
- C. Install certificates for sales.pulse.local and finance.pulse.local on the same interface.
- D. Load multiple server certificates (one for each hostname), and create a virtual port to associate the specific URL.

Correct Answer: AD

QUESTION 5

What are three benefits of choosing Junos Pulse for VPN tunneling? (Choose three.)

- A. Endpoint security is integrated with Junos Pulse.
- B. ESP transport methods are available for Windows, Macintosh, and Linux platforms.
- C. WSAM integration is available for Microsoft Windows platforms.
- D. Support is available for a variety of mobile devices.
- E. SSL transport methods are available for Linux platforms.

Correct Answer: ACD
