QUESTION 1

Click the Exhibit button.

An EX-series switch is configured as shown in the exhibit. A network outage has caused the RADIUS server and the TACACS+ server to become unreachable.

If a user attempts to login to the switch during this outtage, which statement is correct?

```
[edit system]
lab3s1# show
authentication-order  [ radius tacplus ];
```

A. The user would be required to login with the root user account.

B. The user would be required to access the switch through the console connection.

C. The authentication fails because there is no valid authentication method.

D. The authentication is performed using the local password database.

Correct Answer: D

QUESTION 2

What are three initial configuration options for EX-series switches? (Choose three.)

A. Initiate the EZ-setup wizard from the shell prompt by typingezsetup.

B. Initiate the EZ-setup wizard from operational mode by typingezsetup.

C. Perform the initial configuration manually with the JUNOS CLI.

D. Initiate the J-Web EZ-setup Initial Configuration wizard through the LCD menu by choosing factory-defaults setup.

E. Initiate the J-Web EZ-setup Initial Configuration wizard through the LCD menu by choosing Initial Setup.

Correct Answer: ACE
