QUESTION 1

You have implemented APBR on your SRX Series device and are verifying that your changes are working properly. You notice that when you start the application for the first time, it does not follow the expected path.

What are two reasons that would cause this behavior? (Choose two.)

- A. The application system cache does not have an entry for the first session.
- B. The application system cache has been disabled.
- C. The application system cache already has an entry for this application.
- D. The advanced policy-based routing is applied to the ingress zone and must be moved to the egress zone.

Correct Answer: AB

QUESTION 2

Click the Exhibit button.

```
[edit]
user@host# show security policies from-zone internet to-zone dmz
policy dmz-poll {
    match {
        source-address any;
        destination-address any;
        application any;
    }
    then {
        permit {
            application-services {
                idp;
            }
        }
        log {
            session-close;
        }
    }
}

[edit]
user@host# show security idp
idp-policy idp-poll {
    rulebase-ips {
        rule r1 {
            match {
                attacks {
                    predefined-attack-groups "HTTP All";
                }
            }
            then {
                action {
                    ignore-connection;
                }
            }
        }
        rule r2 {
            match {
                attacks {
                    predefined-attack-groups "DNS All";
                }
            }
            then {
                action {
                    close-server;
                }
                ip-action {
                    ip-notify;
                }
            }
        }
    }
}
```

Referring to the configuration shown in the exhibit, which statement explains why traffic matching the IDP signature DNS:OVERFLOW:TOO-LONG-TCP-MSG is not being stopped by the SRX Series device?

- A. The security policy dmz-pol1 has an action of permit.
- B. The IDP policy idp-pol1 is not configured as active.
- C. The IDP rule r2 has an ip-action value of notify.
- D. The IDP rule r1 has an action of ignore-connection.

Correct Answer: B

QUESTION 3

Click the Exhibit button.

```
[edit security utm]
user@host# show
feature-profile {
    content-filtering {
        profile web-traffic-profile {
            block-content-type {
                zip;
            }
        }
    }
}
utm-policy utm-web-policy {
    content-filtering {
        http-profile web-traffic-profile;
    }
}
```

The UTM policy shown in the exhibit has been applied to a security policy on a branch SRX Series device. In this scenario, which statement is true?

- A. HTTP downloads of ZIP files will be blocked.
- B. FTP downloads of ZIP files will be blocked.
- C. E-mail downloads of ZIP files will be blocked.
- D. ZIP files can be renamed with a new extension to pass through the filter.

Correct Answer: A

**QUESTION 4**

You are scanning files that are being transferred from the Internet to hosts on your internal network with Sky ATP. However, you notice that files that are 1 GB in size are not being scanned by Sky ATP.

In this scenario, which two statements are true? (Choose two.)

- A. The Sky ATP failback option is set to permit.
- B. The Sky ATP engine or the SRX Series device is too busy.
- C. The 1 GB file size is larger than the scan size limit for Sky ATP.
- D. The Sky ATP policy on the SRX Series device is misconfigured.

Correct Answer: CD

QUESTION 5

Click the Exhibit button.

```
user@host# show security advance-policy-based-routing
profile profile1 {
  rule rule-app1 {
    match {
      dynamic-application junos:HTTP;
    }
    then {
      routing-instance R1;
    }
  }
  rule rule-app2 {
    match {
      dynamic-application junos:junos:web:social-networking;
    }
    then {
      routing-instance R2;
    }
  }
  rule rule-app3 {
    match {
      dynamic-application junos:YAHOO;
    }
    then {
      routing-instance R3;
    }
  }
}
```

Your organization requests that you direct Facebook traffic out a different link to ensure that the bandwidth for critical applications is protected.

Referring to the exhibit, which forwarding instance will be used on your SRX Series device?

- A. R3
- B. R1
- C. R2
- D. inet.0

Correct Answer: C
