QUESTION 1

You are asked to allocate security profile resources to the interconnect logical system for it to work properly. In this scenario, which statement is correct?

A. The NAT resources must be defined in the security profile for the interconnect logical system.

B. No resources are needed to be allocated to the interconnect logical system.

C. The resources must be calculated based on the amount of traffic that will flow between the logical systems.

D. The flow-session resource must be defined in the security profile for the interconnect logical system.

Correct Answer: D

Explanation: The flow-session resource is needed in order to ensure adequate and secure communication between the two logical systems.
