Correct Answer: AB

**QUESTION 3**

You are asked to allocate security profile resources to the interconnect logical system for it to work properly. In this scenario, which statement is correct?

- A. The NAT resources must be defined in the security profile for the interconnect logical system.
- B. No resources are needed to be allocated to the interconnect logical system.
- C. The resources must be calculated based on the amount of traffic that will flow between the logical systems.
- D. The flow-session resource must be defined in the security profile for the interconnect logical system.

Correct Answer: D

Explanation: The flow-session resource is needed in order to ensure adequate and secure communication between the two logical systems.
