**QUESTION 1**

You are proposing the purchase of a new e-mail server for your corporate network. You have specified a new server from a major OEM manufacturer that is configured with a powerful quad-processor configuration, hot-swappable hard drives, and redundant power supplies and network adapters, with a three-year onsite warranty. Due to a budget crunch, the chairperson of the budget committee has suggested that the company can make do with a less powerful workgroup server from a local computer store. This server has only a single processor and no redundancy features, and a one-year onsite warranty. What reasons can you provide the budget committee members that might convince them to authorize the purchase of the server that you specified, even though it has a higher price tag?

- A. A more powerful server will provide better performance and scalability as the company's needs grow over time.
- B. Redundant hardware components will increase the server's availability to service the needs of the company's users and customers.
- C. The extended warranty on the more powerful server will increase support costs over time, since you're paying to cover the machine under warranty for three times as long.
- D. Windows Server requires at least a dual-processor configuration.

Correct Answer: AB

---

**QUESTION 2**

The ABC.com network consists of a single Active Directory domain named ABC.com. All the servers on the network run Windows Server servers.

The network contains a file server named ABC-SR24. ABC-SR24 hosts shared folders for users in the Sales department.

All shared folders are backed up using a Normal backup on a weekly basis over the weekend. An incremental backup of the shared folders is taken every night.

A Copy backup of the shared folders is taken every Thursday night after the incremental backup. On Friday morning, the Sales manager reports that he has accidentally deleted an important file. He asks you to restore the file as quickly as

possible. He doesn't know when the file was last modified.

From which backup tape or tapes should you restore the file?

- A. The last normal backup and the last incremental backup.
- B. The last normal backup and the incremental backups from Monday, Tuesday, Wednesday and Thursday.
- C. The last incremental backup.
- D. The last normal backup.
- E. The last Copy backup.

Correct Answer: E

---

**QUESTION 3**

The only protocol used by your network is TCP/IP, despite the fact that workstations in the organization do not have access to the Internet. A user has been accessing files on server on your network and now wants to connect to a Web server

that is used as part of the company\\'s intranet. The user enters the URL of the Web site into Internet Explorer.

Which of the following servers will be used to provide information needed to connect to the Web server?

- A. DHCP server
- B. DNS server
- C. WINS server
- D. File server

Correct Answer: B

---

**QUESTION 4**

You are configuring a remote access server on a Windows Server computer. The same server is acting as a domain controller and DHCP server, assigning IP addresses to clients. Which of the following is the simplest method of assigning IP addresses for remote clients?

- A. Manually configure each client with an IP address.
- B. Configure the RRAS server to use DHCP.
- C. Configure a static address pool.
- D. Use APIPA.

Correct Answer: B

---

**QUESTION 5**

You are the network administrator for your company. The network consists of a single Active Directory domain with five domain controllers that run Windows Server, Enterprise Edition. You are updating the public key infrastructure (PKI) for your company. Issuing Certification Authorities (CAs) have been provided certificates with a validity period of five years. Certificates are issued to enable network users to encrypt files on their computers. Basic EFS certificates have been issued and have been configured with the default validity period. You want to configure all new EFS certificates so that they are valid for up to three years.

What should you do? Each correct answer presents part of the solution. (Choose all that apply.)

- A. Duplicate and rename the Basic EFS certificate template.
- B. Open the Basic EFS certificate template Properties dialog box.

- C. Select the General tab and edit the validity period.
- D. Select the General tab and edit the renewal period.
- E. Select the Security tab and change the permission for the Administrators group to Enroll.

Correct Answer: AC
