**QUESTION 1**

You want to set up a discussion group that can be accessed over the corporate intranet, so that users can view and post messages in a forum that can be viewed by other employees.

Which of the following services would you use to implement this functionality?

- A. HTTP
- B. FTP
- C. NNTP
- D. SMTP

Correct Answer: C

QUESTION 2

You have an IAS server running Windows Server. It supports a group of RRAS servers used to manage VPN connections for clients. You are configuring the authentication methods for the IAS server and want to allow the clients to use smart cards for secure and convenient authentication. Which of the following authentication protocols should you select?

- A. MS-CHAP
- B. EAP-TLS
- C. MD5 CHAP
- D. MS-CHAP v2

Correct Answer: B

QUESTION 3

One of your hosts in multiple-host NLB cluster requires maintenance. The cluster is heavily used and central to the profitability of your company. You want to bring the node down for service in the least disruptive way. How should you accomplish this goal?

- A. Use the drainstop option on the host needing maintenance.
- B. Use the drainstop option on all the hosts in the cluster not needing maintenance.
- C. Use the suspend option on the host needing maintenance.
- D. Use the suspend option on all the hosts in the cluster not needing maintenance.

Correct Answer: A

**QUESTION 4**

You are the network administrator for your company. The network consists of a single Active Directory domain with five domain controllers that run Windows Server, Enterprise Edition. You are updating the public key infrastructure (PKI) for your company. Issuing Certification Authorities (CAs) have been provided certificates with a validity period of five years. Certificates are issued to enable network users to encrypt files on their computers. Basic EFS certificates have been issued and have been configured with the default validity period. You want to configure all new EFS certificates so that they are valid for up to three years.

What should you do? Each correct answer presents part of the solution. (Choose all that apply.)

- A. Duplicate and rename the Basic EFS certificate template.
- B. Open the Basic EFS certificate template Properties dialog box.
- C. Select the General tab and edit the validity period.
- D. Select the General tab and edit the renewal period.
- E. Select the Security tab and change the permission for the Administrators group to Enroll.

Correct Answer: AC

QUESTION 5

You are the backup administrator for your company. You are responsible for ensuring that all data on ten files servers are protected against data loss. Normal business hours from 8 A.M. to 5 P.M., Monday through Friday, are observed.

Network access is prohibited outside normal business hours.

A member server named File1 contains shared folder accessed by users in the sales department. The disk structure of File1 is shown in the following exhibit:

Volume	Hosts	Disk Size	Available Space
C	System and Boot Files	9 GB	2.54 GB
D	Shared Folders and User Profiles	25 GB	9.8 GB
F	Shared Folders	75 GB	53.35 GB

You have scheduled a daily backup of File1 as shown in the exhibit. (Click the Exhibit(s) button.) Users in the Sales department frequently leave documents open on their desktops when they leave work. These users occasionally request that

you restore a previous version of a file from backup. However, some of these files are not included in recent backup sets. You must modify the backup procedures for File1 so that all files, including open documents, will be included in the daily

backup. You also want to provide users with the ability to restore their files.

What should you do? (Choose all that apply. Each correct answer presents part of the solution.)

- A. Move all shared user data folders from drive D to drive F.

- B. Move all shared folders user data from drive F to drive D.
- C. Enable Shadow Copies of Shared Folders on drive F.
- D. Enable Volume shadow copy for the scheduled backup job.
- E. Select the Disable volume shadow copy option for the scheduled backup job.
- F. Install the Previous Versions Client software on all Sales department computers.
- G. Create a new daily backup job by using the same settings, but clear the Disable volume shadow copy option.

Correct Answer: ACFG
