**QUESTION 1**

You work as a Network Administrator for ABC.com. The company has a Windows Active Directory-based single domain single forest network. The functional level of the forest is Windows Server. An application named Accounts is installed on

the network. The Accounts application uses a shared folder named AccFolder to keep all its data. The AccFolder folder is placed on a file server named uCFileServer. All users in the network use the application to update the accounts

information of various clients of the company. The application opens various data files to work upon.

You are required to accomplish the following tasks:

All files in the AccFolder folder should be backed up automatically twice daily.

The backup process should take a backup of all the open files in the folder.

In order to accomplish the tasks, you take the following steps:

Configure the Backup and Restore Wizard to take a backup of AccFolder.

Unselect the Disable volume shadow copy check box in the Backup and Restore Wizard.

Set the schedule of the Backup and Restore Wizard to take a backup every 12 hours through the Advanced Schedule Options.

What will happen after taking the required steps?

- A. The backup process will take a backup of all the open files in the folder.
- B. Both tasks will be accomplished.
- C. All the files in the AccFolder folder will be backed up automatically twice daily.
- D. None of the tasks will be accomplished.

Correct Answer: B

---

**QUESTION 2**

Which of the following addresses is suitable for dividing into at least nine subnets, each with the ability to support 200 hosts per network?

- A. 10.1.1.0/24
- B. 10.1.1.0/20
- C. 10.1.1.0/19
- D. 10.1.1.0/22

Correct Answer: BC

---

**QUESTION 3**

The ABC.com network consists of a single Active Directory domain named ABC.com. All servers on the ABC.com network run Windows Server.

ABC.com contains a Development department. ABC.com contains a domain controller named ABC-SR24 which is also configured as a DNS Server. A ABC.com employee named Clive Wilson works in the Development department. One

morning Clive Wilson complains that he cannot connect to another network server.

During investigation, you notice that nslookup queries sometimes take a long time and sometimes fail altogether.

You suspect that there is a problem with ABC-SR24.

How would you configure monitoring on ABC-SR24 so that you can review individual name resolution queries?

- A. Use System Monitor to monitor host resolution queries on ABC-SR24.
- B. Use Event Viewer to view the DNS event log on ABC-SR24.
- C. Select the Log packets for debugging option on the Debug Logging tab in the DNS server properties on ABC-SR24.
- D. Use Network Monitor to capture DNS query packets on ABC-SR24.

Correct Answer: C

---

**QUESTION 4**

You want to set up a discussion group that can be accessed over the corporate intranet, so that users can view and post messages in a forum that can be viewed by other employees.

Which of the following services would you use to implement this functionality?

- A. HTTP
- B. FTP
- C. NNTP
- D. SMTP

Correct Answer: C

---

**QUESTION 5**

You are using Network Monitor to analyze IPSec packets that are using ESP. The data packet section is not viewable. What must you do to properly view the data packet section of the frames?

- A. Set ESP to use the same encryption policy as the Network Monitor machine.
- B. Disable AH policies.

C. Install the ESP filter DLL and update the parser.ini file.

D. Configure the ESP policy to use null encryption.

Correct Answer: D
