Following Questions and Answers are all new published by IBM Official
Exam Center

QUESTION 1

Which of the following statements is true?

A. Changing state of the portlet is not allowed during the serveResource() method.

B. You can change portlet mode and window state during the serveResource() method.

C. You can set new render parameters during the serveResource() method.

D. You can set portlet preferences during the serveResource() method.

Correct Answer: D

QUESTION 2

When creating a styles category, an item needs to be added to the categories array, for example:

```
{
"label":"My new category",
"searchStr":"Search my new category",
"datastore":"com.ibm.data.JsonStore",
"url":????>"
}
```

What should the value of the url attribute be?

A. The url attribute is not required. If the url attribute is omitted, the value of the searchStr is used to find the new styles.

B. The path to the CSS file that contains the style entries for the new category.

C. The path to your theme.

D. The path to the json file that contains the style entries for the new category.

Correct Answer: D

QUESTION 3

When building a custom theme, you can call a JSP and have its response included in the theme.html file at runtime by using a dynamic content spot. Which of the following options is the valid syntax for a dynamic content spot integrating the JSP tabNav.jsp in the file theme.html of the theme PageBuilder2.0?

A.

B.

C.

D. _

Correct Answer: D

QUESTION 4

Which of the following options are advantages of using Lotus OneUI for a portal theme?

A. Keyboard accessibility with hover effects, also providing focus effects or equivalent facilitation.

B. The code base is tested for stability, accessibility, and bidirectionality in multiple browsers.

C. Every page is enforced to look the same regardless of content, disallowing different browsers to make the pages look different under any circumstance or user input.

D. A and B are correct.

Correct Answer: D

QUESTION 5

Jim has created an application template using his local development environment and would like to promote this template to his team shared development environment. What steps will he use to accomplish this?

A. Use the Site Management portlet in the source server to promote the template definition to the target server.

B. Use XMLAccess on the source server to export the template definition file, then use XMLAccess on the target server to import the template definition file.

C. Use the Application Template Library portlet on the source server to export the template definition file, then use the Application Template Library portlet on the target server to import the template definition file.

D. Use the Portal Scripting Interface on the source server to export the template definition file, then use the Portal Scripting Interface on the target server to import the template definition file.

Correct Answer: C
