QUESTION 1

Assume you added a product with custom options to the shopping cart.

Where will the data for the custom options be stored persistently?

- A. in the sales_flat_quote table, as a serialized string in a text field
- B. in the session, as a serialized array
- C. in a separate table, sales_flat_quote_item_option
- D. Magento doesn't store persistent data about custom options; only the new price and new SKU are stored.

Correct Answer: C

QUESTION 2

Assume you have saved a product in the Catalog. Will your last changes be taken into account for rule-based related products?

- A. Only if you go to the "Catalog/Rule-based Product Relations" page, and hit "Reindex All" button.
- B. Only if you clear the cache.
- C. Yes: It will be done automatically by an observer on the catalog_product_save_after event.
- D. Yes: Rule-based related products are calculated on-the-fly.

Correct Answer: C

QUESTION 3

What is the difference in the effect of calling the invoice capture () method versus the invoice pay () method?

- A. No difference: pay () will always call capture ().
- B. Pay () will trigger the payment and capture!) will not.
- C. Capture () will trigger the payment and pay () will not.
- D. The difference is determined by the payment method implementation.

Correct Answer: C

**QUESTION 4**
