**QUESTION 1**

You are adding a new menu item to the admin backend which will link to a custom backend page. The declaration of the route:

```
<router id="admin">
  <route id="mycompany" frontName="mycompany">
    <module name="MyCompany_MyModule"/>
  </route>
</router>
```

What do you specify as the menu item action attribute value so it links to /admin/mycompany/mymodule/?

- A. action="adminhtml/mycompany/mymodule/"
- B. action="admin/mycompany/mymodule/"
- C. It is not possible without extending the adminhtml route in routes.xml
- D. action="mycompany/mymodule/"

Correct Answer: D

---

#### QUESTION 4

You are developing a new theme which inherits from the Magento\_Luma theme. How is this accomplished?

- A. Add Magento/luma to theme.xml
- B. Run the CLI command bin/magento dev:theme:inherit Magento\_Luma
- C. Specify the parent theme in Magento admin > Design > Configuration
- D. Add Magento/luma to etc/view.xml

Correct Answer: A

Reference: <https://www.mageants.com/blog/how-to-create-custom-theme-in-magento-2.html>

---

#### QUESTION 5

You are debugging a problem resulting from a recently deployed around plugin. The plugin is intercepting the doSomething method. The aroundDoSomething plugin method is called successfully, but the original doSomething method is no longer being executed as expected.

What is causing this?

- A. The sort order of the plugin is too high and supersedes the priority of the intercepted method
- B. The plugin implementation returned something other than its callable argument
- C. The plugin implementation is skipping the execution of its callable argument
- D. The plugin implementation overlooked using the AbstractPlugin parent class

Correct Answer: C
