QUESTION 1

Your Magento Commerce Cloud Pro merchant has told you they will have a large sale event and expect four to five times the normal traffic for three days.

Which solution will eliminate downtime, and allow the infrastructure to scale for the event in advance?

- A. Enable and configure scaling in the Magento cloud control panel
- B. Enable and configure scaling in live Cloud section of the Magento admin panel
- C. Submit a Magento support ticket prior to the relevant information
- D. The cloud environment will auto scale based on the traffic levels

Correct Answer: A

QUESTION 2

The marketing team for a Magento Commerce website wants some categories to function as content-focused landing pages instead of product listing pages. They want to include a variety of elements on these pages. Including images, text content, and featured product displays.

The marketing team wants to maintain this content themselves without involving a developer.

How do they accomplish this?

- A. Add the different content elements as widgets in the description field of each category functioning as a landing page
- B. Create a CMS Static Block with the content elements for each landing page and associate each block with the correct category
- C. Change the View type on each landing page Category to Display as CMS Page and add content element to CMS Content area
- D. Have a developer create a custom content fragment they can assign to a category and update for each landing page

Correct Answer: C

QUESTION 3

A merchant is using Magento to manage inventory. The procurement department needs to see which products in the Clothing attribute set have fewer than 50 items in stock while eliminating all unnecessary columns.

How do you do this?

- A. Install a 3rd-party module to provide this report
- B. Enable the Daily Product Inventory Report email feature
- C. Navigate to the Low Stock report and enter the filtering conditions.

D. Create a new product grid view with the necessary filters and column selections

Correct Answer: B

QUESTION 4

A merchant using Magento Commerce for B2B enabled the requisition lists feature to speed up the order process for their customers. Some users are stating the requisition list is hidden for other users in their company.

Why is this happening?

- A. You must enable the share requisition lists for each company in Magento admin panel
- B. The requisition lists are created by users and are shared by company
- C. You must enable share option in Requisition Lists configuration
- D. The company admin user must enable share requisition lists option in their company account panel

Correct Answer: C

QUESTION 5

A merchant would like a promotional content block on the cart which changes by customer segment. The content should only appear when your cart total is \$50 or more excluding shipping.

What solution will meet the requirement?

- A. Create a widget with a static block assigned to a customer price rule.
- B. Create a dynamic block and choose the customer segment
- C. Create a static block and add it to the layout area for the shopping cart with the customer segment
- D. Create a banner, apply the customer segment to the banner and choose the banner price rule

Correct Answer: B
