**QUESTION 1**

A merchant plans to migrate product data from Magento 1 to Magento Commerce. During your analysis of a merchant's exiting product data structure, you notice they have created multiple custom product attributes to manage the translation of color options across their websites.

You recommend utilizing a single custom product attribute to manage their color options

In addition to setting up the attribute, what must be done?

- A. Change the attribute scope to store view so the values can be managed separately for each language.
- B. Add all possible attribute values in each of the languages to the attribute.
- C. Create different attribute sets, one for each language and associate the attribute with its values to each,
- D. Add a default set of attribute values, and add store view specific labels to both the attribute and its values for the other two languages

Correct Answer: D

---
