QUESTION 1

Magento Commerce Cloud comes with a variety of additional features that sets it apart from the on-premise Magento Commerce and Magento Open Source platforms.

What feature improves the release update process and simplifies commands to create a backup of the database, apply custom patches, and verify environment configuration?

- A. Docker environment
- B. Magento Cloud-specific CLI
- C. Cloud configuration wizards
- D. ECE-Tools package

Correct Answer: D

Reference: <https://devdocs.magento.com/cloud/bk-cloud.html>

QUESTION 2

You need to specify the admin password using an environment variable. You have created an environment variable `env:ADMIN_PASSWORD` with a valid password. When attempting to log in to the Magento Admin it is not accepting the new password.

How do you correct the environment variable?

- A. The Sensitive option is checked by default and must be disabled
- B. The `env:ADMIN_PASSWORD` variable can only be used for an initial installation
- C. The environment variable should not have the `env:` prefix
- D. The `ADMIN_PASSWORD` variable should be configured via `.magento.env.yaml`

Correct Answer: C

Reference: https://devdocs.magento.com/cloud/env/environment-vars_magento.html

QUESTION 3

You are going to create a backup of an Integration branch before implementing some new feature.

What are two ways to create the backup of the Integration branch? (Choose two.)

- A. Create a snapshot using the `ece-tools snapshot:create` command
- B. Create a snapshot using the snapshot button in the Project Web UI
- C. Create a snapshot using the `magento-cloud snapshot:create` command

D. Submit a support ticket requesting a backup be made

Correct Answer: BC

QUESTION 4

You are working with a new developer who needs to be able to deploy code and view logs on Magento Commerce Cloud.

What must you do to give them access?

- A. In the .magento.app.yaml file, add their email under Users. They need to enter their SSH public key.
- B. Add their SSH public key to a file named .ssh/authorized_keys and deploy the change.
- C. In the Cloud Project Web UI, click Add User to add their email. They need to enter their SSH public key.
- D. Add a Magento admin user for them and paste the SSH public key into their user's SSH Key field, which is available only on Magento Commerce Cloud.

Correct Answer: B

Reference: <https://devdocs.magento.com/cloud/before/before-workspace-ssh.html>

QUESTION 5

For the Magento search backend, you would like to move from MySQL to Elasticsearch for your existing project. You have confirmed that your services.yaml file is configured appropriately. However, after your most recent deployment, you notice the search engine is still set to MySQL.

What additional step must be completed?

- A. Configure the relationships section of the .magento.app.yaml file
- B. Find an appropriate Elasticsearch module to require with Composer
- C. Specify Elasticsearch as the search engine in the Magento Admin panel
- D. Remove the MySQL service from the services.yaml file

Correct Answer: D

Reference: https://devdocs.magento.com/cloud/project/project-conf-files_services-elastic.html
