### QUESTION 1

You are debugging an issue with an extension that only occurs in Production. The extension writes relevant information using the debug log level.

However, that specific information is not getting written to the logs on Production.

How do you fix this?

- A. Enable developer mode in Production for a short period to gather the required information
- B. Write a custom logger that writes the debug information to var/log/custom.log
- C. Enable debug logging in app/etc/config.php locally and deploy it to Production
- D. Enable debug logging in the Admin interface in Production

Correct Answer: D

Reference: <https://devdocs.magento.com/guides/v2.3/config-guide/cli/logging.html>

### QUESTION 2

After installing a Magento extension that implements a new class for a site and deploying this to an integration environment, you see it is not working.

In the logs, you discover the following error: The specified /app/generated/code/MyCompany/MyModule/MyClassFactory.php could not be written failed to open stream: Read-only file system

How do you fix this?

- A. A support ticket should be filed with Magento Commerce Cloud to fix the filesystem issue.
- B. The extension should be modified so it does not write to generated at runtime.
- C. The file should be generated locally and pushed via Git.
- D. The GENERATED\_CODE\_WRITABLE variable should be set to true whenever using extensions.

Correct Answer: B

Reference: <https://support.magento.com/hc/en-us/articles/115002541893-Error-read-only-file-systemwhen-accessing-the-read-only-directory-var-generation->

### QUESTION 3

You are a technical admin on a Magento Commerce Cloud account. A coworker needs to submit a support request with Magento Support.

What is needed to enable support ticket access?

- A. Ask the account owner to add the user to shared access.
- B. Ask the launch manager to create a support account for this user.
- C. Change the environment access role to contributor for this user.
- D. Update the project role of this user to administrator.

Correct Answer: A

#### QUESTION 4

While investigating an inherited Magento Commerce Cloud project, you notice the following SCD\_MATRIX configuration in `.magento.env.yaml`:

stage:

global:

SCD\_MATRIX:

"magento/backend":

language:

-en\_US

What is the effect of this configuration?

- A. Static content for frontend themes is generated during the deploy phase
- B. All frontend theme static content will be reused from the previous deployment
- C. Only the static content for the adminhtml area will be generated
- D. Static content for all locales will be generated for all frontend themes

Correct Answer: D

Reference: <https://devdocs.magento.com/cloud/env/variables-deploy.html>

#### QUESTION 5

You have created a new Integration branch and did not receive the administrator email with the password reset link.

What is prohibiting the email from sending?

- A. You have not enabled the Magento Email module with `bin/magento module:enable`
- B. The Outgoing Emails setting is disabled under Environment Settings in the Project Web UI

- C. Email is always disabled on all integration branches
- D. You have not configured SendGrid for this environment

Correct Answer: B
