**QUESTION 1**

You are the production planner for a manufacturing company.

After running operations scheduling for a production order, the following error message displays:

Message details

Production - Operations scheduling

^ Production: P000885

^ Production - Operations scheduling

^ Production: P000885

^ Operation 10 Primary

⊗ Production order P000885 could not be scheduled. Not enough capacity could be found.

⊗ Update has been canceled.

You need to identify the cause of the error.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Navigate to the work calendar and view working times. Validate that there are working days created in the scheduled period.

B. Review the calendar for the resource to determine if it is expired.

C. Review the available resources for Operation 10. Navigate to the Resource form and validate whether there is a calendar assigned.

D. Review the resource group assigned to Operation 10. Check to see if there is a calendar assigned and if the calendar is expired.

Correct Answer: BC

QUESTION 2

HOTSPOT

You need to modify the production order defaults for the manufacturing execution production order Start process.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Production order defaults

| General | Start | Operations | Report as finished | Quantity validation |
|---|-------|------------|--------------------|---------------------|
| Start JOURNALS | | | | |
| Update start on-line Status + quantity | | | | |
| Use Manufacturing Execution param... Yes | | | | |
| Open picking list journals Yes | | | | |

QUESTION 3

A manufacturer produces HDMI cables. Typically, the item is manufactured.

The manufacturer will occasionally buy unbranded HDMI cables from a vendor in order to keep up with demand. The company must use the same item number whether they make or buy the item.

What should you do?

- A. Select route type as vendor on the route operation when the item is to be purchased.
- B. In default order settings, select Production for the default order type
- C. Create a new vendor resource when the item is to be purchased

D. In default order settings, select Purchase for the default order type

Correct Answer: B

Default order type "Production". It can be purchased also. In case of purchase you dont need a production order, because the same item number must be purchased: "The company must use the same item number whether they make or buy the item"

QUESTION 4

HOTSPOT

You need to resolve the production manager issue.

How should you configure manufacturing execution? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Automatic BOM consumption stage

Field

QUESTION 5

You need to resolve the issue for UserB.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Set up configuration and weight for partial visibility.
- B. Set up configuration and weight for full visibility.
- C. Create a product master with predefined variants for ounces and boxes.
- D. Create a catch weight item.

Correct Answer: BD

Explanation:

Mixes are generally stored and sold in 16-ounce bags. Some quantities are sold and distributed in 5, 10, and 20-gallon containers to large restaurants.

B: Catch weight items that use full visibility require that the inventory quantity is known for each catch weight unit. For example, assume shrimps are sold in boxes and the customer requires that each box must have a unique identification and a known weight. In this example, the item number for the boxes of shrimps should be created as a catch weight

item that uses full visibility. You create catch weight items that use full visibility if you assign a unique serial number to each catch weight unit.

D: You often use catch weight products in industries where products can vary slightly by weight or size, or both, such as the food industry. Catch weight products use two units of measure
