**QUESTION 1****DRAG DROP**

You need to configure quality controls.

Which solution objects should you configure? To answer, drag the appropriate solution objects to the correct configurations. Each solution object may be used once, more than once, or not at all. You may need to drag the split bar between

panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

**Solution objects**

Item groups
Test groups
Quality groups
Quality associations

**Answer Area****Configuration**

Configure the system for testing requirement 1.

Specify the items for testing requirement 2.

**Solution object**

Correct Answer:

**Solution objects**

Item groups
Quality associations

**Answer Area****Configuration**

Configure the system for testing requirement 1.

Specify the items for testing requirement 2.

**Solution object**

Test groups
Quality groups

Box 1: Test groups

Requirement 1: 100 percent of all nutritional supplements and 50 percent of all energy drinks must be tested when production orders are completed. After a product is in testing, 100 percent of all tests must be completed.

You use the Test groups page to set up, edit, and view test groups and the individual tests that are assigned to them. The upper part of the page shows the test groups, and the lower part shows the tests that are assigned to a selected test

group.

You assign several policies to a test group, such as a sampling plan, an acceptable quality level (AQL), and the requirement for destructive testing. Then, when you assign an individual test to a test group, you define additional information,

such as the sequence, documents, and validity dates. For a quantitative test, the information that you define also includes the acceptable measurement values. For a qualitative test, the information includes the test variable and default

outcome.

The test group that is assigned to a quality order defines the default set of tests that must be performed on the specified item. However, you can add, delete, or change tests for the quality order. Test results are reported for each test on a

quality order.

#### Box 2: Quality groups

Requirement 2: 75 percent of all nutritional supplements and energy drinks should be tested against their required tests during an outbound process.

#### Quality groups

A quality group represents common testing requirements for items. Use and create item quality groups to logically group products so that they can be assigned to quality associations for the automatic generation of quality orders.

#### Example of an item quality group

A manufacturing company purchases various raw materials that have the same testing requirements for incoming inspection. Therefore, the company defines a quality group and then assigns the item numbers that are associated with the raw

materials to that group. Later, the company purchases a new type of raw material that has the same testing requirements. Instead of setting up new testing requirements for the new material, the company adds the item number for the new

material to the existing quality group.

---

## QUESTION 2

A company runs out of inventory in warehouse 22 but has overstock in warehouse 11. The warehouses are linked to the same site.

The inventory must be moved from warehouse 11 to warehouse 22.

The company must retain ownership of the inventory financially and be able to generate reports as to where the inventory value resides at all times.

You need to create an order to move the stock.

What should you do?

A. Create a transfer order from the transit warehouse to warehouse 22.

B. Create a transfer order from warehouse 11 to the transit warehouse.

C. Create a transfer order from warehouse 11 to warehouse 22.

D. Create a sales order for warehouse 11 and a purchase order for warehouse 22.

Correct Answer: C

---

### QUESTION 3

A company that uses Dynamics 365 Supply Chain Management recently became ISO 9001-certified.

The company must begin documenting nonconformances.

You need to configure the nonconformance functionality.

Which three features must you configure? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. routes

B. operations

C. diagnostic types

D. quality charges

E. quarantine zones

Correct Answer: BCD

Nonconformance management configuration process

Before you can start to use the nonconformance management features and generate nonconformances, you must configure the system and prerequisites. Here is a list of the steps that are required to configure nonconformance management.

Enable quality and nonconformance management.

Configure workers who are responsible for approving nonconformances.

Configure problem types.

Configure quarantine zones.

Configure diagnostic types.

Configure operations.

Optional: Configure quality charges.

After the configuration is completed, you can start to create and process nonconformances.

**QUESTION 4****DRAG DROP**

You are the product manager at a distribution company. You are responsible for managing product compliance standards and reporting.

Chemical product C0001 can be sold in all parts of the United States except for the state of California.

You need to set up these compliance requirements for C0001.

Which four actions should be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

**Actions**

Create an inclusive list type for New York, United States

Create an exclusive list type for California, United States

Add item C0001 to the restricted product lists

Open the Restricted products regional lists form

Create an inclusive list type for the United States

Create a regulated products regional list for California, United States. Add item C0001 to the list

Open the Regulated products regional lists

**Answer Area**

Correct Answer:

**Actions**

Create an inclusive list type for New York, United States

Create a regulated products regional list for California, United States. Add item C0001 to the list

Open the Regulated products regional lists

**Answer Area**

Open the Restricted products regional lists form

Create an inclusive list type for the United States

Create an exclusive list type for California, United States

Add item C0001 to the restricted product lists

**QUESTION 5**

A company uses Dynamics 365 for Finance and Operations.

An employee notices a discrepancy in inventory.

You need to create the inventory blocking transaction.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. inventory status
- B. quality order
- C. batch disposition code
- D. manual inventory blocking

Correct Answer: BD
