### **QUESTION 3**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company has an agreement to pay royalties to a third party for use of their logo.

A royalty contract must be setup so that the third party paid monthly. The payment is based on invoiced sales.

You need to create a royalty contract and create monthly Accounts payable to the third party.

Solution: Use the automatically calculated royalty amounts to approve and then create a monthly claim to pay the vendor.

Doss the solution meet the goal?

A. Yes

B. No

Correct Answer: B

### **QUESTION 4**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are the purchasing manager at a manufacturing company that makes audio equipment.

You sign an agreement with a vendor to purchase 5,000 speaker cables, item C0001, at a discounted rate of \$3.00 per cable. This agreement expires in exactly one year.

You need to set up pricing information and track the fulfillment of the agreement.

Solution:

1.

Create a trade agreement journal of type Price (purch.).

2.

Add a line for item C0001 for the vendor.

3.

Enter a unit price of \$3,00 for a quantity up to 5,000 and enter an expiration date for next year. Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

### **QUESTION 5**

### **HOTSPOT**

A company uses Dynamics 365 Supply Chain Management. The company purchased new forklifts for the warehouse.

The types of forklifts vary based on the purpose within the warehouse. Parts, such as belts and wheels, are not always universal and could be specific to the forklift manufacturer and model. The forklift purchase orders must go through a

purchase requisition approval process because they are being purchased from new vendors.

You need to determine where to capture the manufacturer and model information for each forklift.

On which component should you capture the information for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

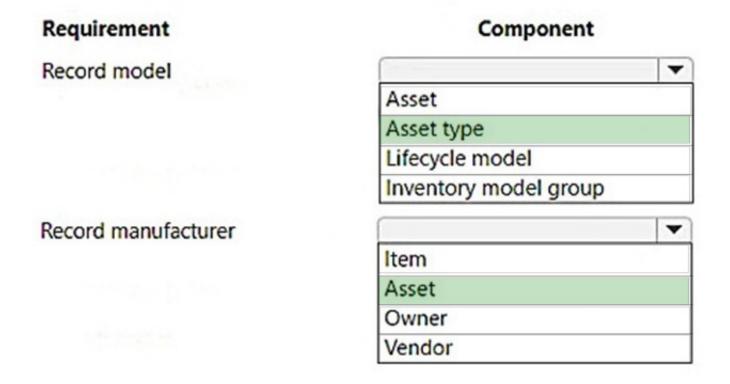

Hot Area:

# Record model Record model Asset Asset type Lifecycle model Inventory model group Record manufacturer Item Asset Owner

Vendor

Correct Answer:

Explanation:

Box 1: Asset type Record model Set up product-model relations

Select Asset management > Setup > Assets > Manufacturer and model.

Select New to create a new product.

In the Manufacturer field, enter a name for the asset manufacturer.

In the Description field, enter a description.

On the Models FastTab, select Add to create an asset model that should be related to the asset manufacturer.

In the Model field, enter a name for the asset model.

In the Description field, enter a description.

In the Asset type field, select the asset type that the manufacturer model should be related to.

Incorrect:

: \* Inventory model group

Record model Item model groups are created to control how items are managed in inventory regarding receipts, issues, consumes, reservations, etc. Item model groups can be set up to control how all stocked items of a certain type are handled and similarly how all non-stocked items of a certain type are handled.

\* Lifecycle model

What is the asset lifecycle modeling?

What is the Asset Life Cycle?

Each asset goes through 5 main stages during its life: plan, acquire, use, maintain, and dispose. The majority of time is spent in the use and maintain phases, but each stage plays an equally important role in ensuring you get the most from

your asset.

Box 2: Asset Record manufacturer
