### QUESTION 1

You need to report newly manufactured bicycles as finished products.

Which three options can you use? Each correct answer presents a complete solution.

- A. Route card journal
- B. Job card journal
- C. Standard production order update
- D. Report as finished journal
- E. Handheld warehouse device

Correct Answer: ADE

Note: Finished goods are reported as finished by the warehouse worker who picks up the finished product from the packaging area. Finished products must automatically have put-away work completed for them.

Put-away work can be generated for items that are enabled for warehouse processes. The quantity is reported to the output location. Warehouse work is then generated to move the quantity from the output location to its final destination defined by the location directive for the put-away work.

A quality order can be created when a production order is reported as finished if a quality association has been set up.

Note: Set a production order to Reporting as finished You can set a production order to Report as finished through the standard production order update function, or through the route and job card journals, or through the journal Report as finished. You can also update the stage to Report as finished through the job card terminal and job card device pages, when you report on the last job of the production order. Finally, you can enable the Report as finished option as a process for the handheld warehouse device solution.

### QUESTION 2

A company implements Dynamics 365 Supply Chain Management and configures the system to support process manufacturing.

The company manufactures pain-relieving lotions. Several of the primary ingredients are delivered at different concentrations depending on the ingredient and vendor. Ingredient A is the primary active ingredient In the lotion. Ingredients is

used as a compensating ingredient.

You need to ensure that the system is set up to support the manufacturing process.

Solution: Set up the batch attributes for a minimum value, a maximum value, and a target level for the filler ingredients.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: A

---

### QUESTION 3

A manufacturing plant uses Lean process. You plan to outsource a painting operation to a subcontracting vendor. You create a service item named SP-01 to represent the painting service.

You need to create a subcontracting activity for the painting service.

Solution:

1.) Create a purchase agreement for the subcontracting vendor and add SP-01 as the painting service 2.) Create a vendor resource then create a work cell for outsourced painting and add the resource to the work cell

3.) Create a production flow process activity for the painting work cell and add the component to be painted as a picking activity 4.) Create a service term to tie the purchase agreement to the activity Does this solution meet the goal?

A. Yes

B. No

Correct Answer: B

---
