**QUESTION 1**

You need to configure the manufacturing groups for the standard model bicycle and the new limited-edition bicycle for the summer season. Which object should you use?

- A. Operating units
- B. Departments
- C. Commerce channels
- D. Legal entities
- E. Teams

Correct Answer: A

The standard model and limited-edition bicycle teams are separate operating units within the manufacturing division. Financials are tracked and reported separately even though they are produced and sold in the same sales channels.

QUESTION 2

A company manufactures high performance bicycles.

The bicycles come in several different preconfigured models. Customers can also purchase custom configurations. Several add-ons are dependent on other accessories in order to be installed. You need to set up the system to handle the

different product configurations.

What should you do?

- A. Create an expression constraint.
- B. Create a phantom BOM.
- C. Create a co-product.
- D. Create a batch version.

Correct Answer: B

QUESTION 3

A company produces and distributes seafood to supermarkets. During the manufacturing process, raw seafood is purchased, cleaned, and packaged into various-sized boxes. Each box may have a different weight.

Product is sold by the box and priced by the pound.

You need to ensure that you can perform transactions at the box level and record the net weight of goods shipped to a customer.

Solution: Set up a unit sequence group on the item for both pounds and boxes, then set a standard unit conversion for the product from box to pounds.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 4

A pharmaceutical company is implementing Dynamics 365 Supply Chain Management.

The formulas for medication include a single active ingredient. The active ingredient will be defined with a target level and specified deviation ranges from the target.

You need to set up the active ingredient items.

Which two actions must you perform? Each answer presents a partial solution.

NOTE: Each correct selection is worth one point.

A. Configure inventory batch attributes.

B. Enable serial tracking.

C. Enable batch tracking.

D. Configure expiry dates for a batch.

Correct Answer: AC

A: Products that have an active ingredient

A product can be defined by its concentration of an active ingredient. The active ingredient of a product is modeled by using a product-specific batch attribute that has a minimum value, a maximum value, and a target level.

C: To associate a base attribute with a product, the following setup is required:

The product must be batch-controlled. To make a product batch-controlled, you must assign a tracking dimension group to the product that has an active Batch dimension.

The attribute that indicates the ingredient levels must be defined as a product-specific batch attribute for the product.

To look up and edit the actual value of the active ingredient for a batch:

Go to Inventory management > Inquiries and reports > Tracking dimensions > Batches.

Select a batch number from the grid.

On the Action Pane, open the View tab and then select Inventory batch attributes.

QUESTION 5

You need to address the ignition switch issue.

Which three actions should you perform? Each answer presents part of the solution.

- A. Copy link and products.
- B. Set product readiness to manual.
- C. Define business impact.
- D. Set product readiness to automatic.
- E. Change product lifecycle state.

Correct Answer: BCE

B: Types of readiness checks

There are three types of readiness checks:

System check ?The system verifies whether there is a valid record. For example, the record might be an active bill of materials (BOM).

Manual check ?A user verifies whether the record is valid.

Checklist

C: Through product versions and engineering change management, you can document, assess the impact of, and apply engineering changes throughout the whole lifecycle of a product.

E: Engineering change management feature summary include:

Improved product lifecycle management through fine-grained control over when a released product can be used in specific business processes

Incorrect:

Not D: There is no automatic setting of products.

Customer service is receiving calls that the firepit ignition switch does not always work as expected. This issue was reported through an engineering change request.
