QUESTION 1

HOTSPOT

You need to configure security for the CashDisc form.

What changes should you make? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Account	Action
Accounts Payable Manager	<div style="border: 1px solid black; padding: 2px;">▼</div> <div style="border: 1px solid black; padding: 2px;">Duplicate the role and modify the existing privilege entry point access.</div> <div style="border: 1px solid black; padding: 2px;">Create a new duty and privilege and add both to the role.</div> <div style="border: 1px solid black; padding: 2px;">Run the security tool and validate access for the role.</div>
Accounts Payable Clerk	<div style="border: 1px solid black; padding: 2px;">▼</div> <div style="border: 1px solid black; padding: 2px;">Create a new role for the AP clerk and restrict delete access for the CashDisc form.</div> <div style="border: 1px solid black; padding: 2px;">Create a new duty and add the existing privilege and add duty to the role.</div>

Correct Answer:

Account	Action
Accounts Payable Manager	<div style="border: 1px solid black; padding: 2px;">▼</div> <div style="border: 1px solid black; padding: 2px; background-color: #e0ffe0;">Duplicate the role and modify the existing privilege entry point access.</div> <div style="border: 1px solid black; padding: 2px;">Create a new duty and privilege and add both to the role.</div> <div style="border: 1px solid black; padding: 2px;">Run the security tool and validate access for the role.</div>
Accounts Payable Clerk	<div style="border: 1px solid black; padding: 2px;">▼</div> <div style="border: 1px solid black; padding: 2px; background-color: #e0ffe0;">Create a new role for the AP clerk and restrict delete access for the CashDisc form.</div> <div style="border: 1px solid black; padding: 2px;">Create a new duty and add the existing privilege and add duty to the role.</div>

QUESTION 2

You are a Dynamics 365 Finance and Operations developer.

You have a form that displays customer records by using a listpage control. You must add related sales total information

for the selected customer to the form.

You need to display the required related sales total information.

What should you add to the form?

- A. a custom lookup
- B. a tile
- C. a factbox
- D. an external feed
- E. a quick filter

Correct Answer: C

A list page presents a set of data on a user interface that is optimized so that you can browse records, find the right record, and then take an action upon that record. The list page lets the user search, filter, and sort the data. FactBoxes on the right side of the grid show related data for the active record.

Reference: <https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/user-interface/list-page-form-pattern>

QUESTION 3

You are Dynamics 365 Finance and Operations developer.

You need to explain the performance advantages of the different concurrency models.

What are three performance advantages of optimistic concurrency control over pessimistic concurrency control? Each control answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Records are locked as soon as they are retrieved from the database.
- B. Records remain available for other processes while they are selected from the database.
- C. Records are locked for a shorter length of time.
- D. Fewer resources are used to lock records during updates.

Correct Answer: BCD

Optimistic Concurrency only locks records from the time when the actual update is performed.

Following are the advantages of using OCC:

Records remain available for other processes to update if they have been selected from the database but haven't yet been updated.

Records are locked for a shorter length of time.

Fewer resources are used to hold the locks during the update process.

Incorrect Answers:

A: Pessimistic Concurrency Control locks records as soon as they are fetched from the database for an update.

Reference: <https://docs.microsoft.com/en-us/dynamicsax-2012/developer/optimistic-concurrency-control>

QUESTION 4

You need to implement the payroll application data process.

Which two objects should you create? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a data contract class that uses the DataContractAttribute attribute
- B. a service class that has a public method which accepts a single parameter for a contract
- C. a class that extends SysOperationServiceBase
- D. an UIBuilder class that extends SysOperationAutomaticUIBuilder

Correct Answer: AC

Scenario: You must develop a process to import payroll journals into the system.

A: Data Contract: Data contract class is the model class defining attributes needed for batch operations. These attributes are provided by the user, in a dialog. DataContractAttribute attribute is needed for the class and the properties methods requires DataMemberAttribute attribute.

C: Service: Service class extends from the SysOperationServiceBase class and contains the business logic for the batch operation. Developers often tend to add the business logic in controller classes, which violates the Single responsibility principle.

Incorrect Answers:

D: UI Builder: UI Builder class extends from SysOperationAutomaticUIBuilder class and is used for adding custom behavior to dialog / dialog fields dynamically constructed by the SysOperation framework.

QUESTION 5

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a form for Dynamics 365 Finance.

You need to add a button that allows users to run a report.

Solution: Create a command button and link the button to the report by using the button's object property.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

You would need to use the on-click property of the command button.

Reference: <https://support.microsoft.com/en-gb/office/use-a-command-button-to-start-an-action-or-a-series-of-actions-c7bf2827-2f3e-42b8-83d6-6c4f0de78990> <https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/user-interface/action-controls>
