QUESTION 1

HOTSPOT

A midsize company is enrolled in the self-guided FastTrack program. The company is preparing a Dynamics 365 Supply Chain Management implementation to go Irve.

You need to complete the prerequisites for the Go-live checklist.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement

Identify best practice violations in the development environment.

Generate a Customization Analysis Report (CAR).
Perform user acceptance testing (UAT).
Complete performance testing.
Run the Subscription estimator tool.

Complete setup for all milestones in Lifecycle Services (LCS).

Enter a Go-live date.
Enter a cutover date.
Enter a user acceptance testing (UAT) date.

Correct Answer:

Answer Area

Requirement

Identify best practice violations in the development environment.

Generate a Customization Analysis Report (CAR).
Perform user acceptance testing (UAT).
Complete performance testing.
Run the Subscription estimator tool.

Complete setup for all milestones in Lifecycle Services (LCS).

Enter a Go-live date.
Enter a cutover date.
Enter a user acceptance testing (UAT) date.

Box 1: Perform user acceptance testing Go-live Readiness Review prerequisites The project team should validate solution readiness. The following prerequisites must be met before the Go-live Readiness Review with Microsoft can be initiated. The production environment can be deployed after the Go-live Readiness Review with Microsoft has been successfully completed.

*

 User acceptance testing (UAT) and performance testing have been completed or almost completed in a Tier-2 (or higher) environment.

*

 Etc.

Box 2: Enter a Go-live date

The go-live date in LCS correctly represents the go-live date that you\'re targeting. This date is the date when end users will start live operations, not cutover activities.

QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains

a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to is. As a result, these questions will not appear in the review screen.

A company is implementing Dynamics 365 Finance. The company uses Microsoft 365 apps.

The company wants to integrate Microsoft Word and Excel into Dynamics 365 Finance.

You need to identify the underlying technology that is required.

Solution: Azure DevOps

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

Instead the correct Solution: Azure Active Directory (Azure AD)

Note:

Office integration overview

Applies to these Dynamics 365 apps:

Commerce, Finance, Supply Chain Management

This article reviews Microsoft Office integration concepts and features. The integration depends on several technologies:

Working in Microsoft Azure

*-> Working with Azure Active Directory (Azure AD)

Running a web client in multiple browsers

The Microsoft Office integration capabilities provide users with a productive environment that helps them get the job done by using Office products.

QUESTION 3

A company is implementing Dynamics 365 Finance.

The company needs to streamline the customer collections specialist\\'s daily activities with the application.

The daily activities must consist of the following actions which must be performed in a single location:

1.

View specific metrics in a dashboard about invoice aging and revenue to date by using graphics.

2.

View all invoices past due for 15. 30. 60. and 90 days in separate grids.

3.

Navigate to the past due invoices directly when selecting the invoice records.

You need to identify the feature that meets the requirements.

What should you select?

A. Electronic reporting

B. Forms

C. Workspaces

D. Form personalization

E. Power BI dashboard

Correct Answer: B

Dynamics 365, Development and administration for finance and operations apps

A workspace is defined as...

Part of the primary navigation mechanism.

A form that supports a business activity (a logical group of tasks that make up the work of a target persona).

A way to provide an initial overview and to increase productivity in the activity by allowing simple tasks to be completed directly in the workspace.

Workspaces have the following goals...

Enable the user to understand the current state of the activity to support informed decisions.

Let users navigate to deeper pages by selecting data, which avoids round-trips to pages with no information.

Let users perform light tasks in the workspaces to avoid round-trips to deeper pages.

Complete an activity without leaving the workspace.

Reduce the need for navigation.

Provide visual impact.

Be constructed using prescriptive patterns and best practices that lead to minimal COGS and fast response times.

Examples

An example of a workspace is the Reservation management workspace in Fleet management. You can get to it by accessing the menu item FMClerkWorkspace. The workspace, shown above, has the following items:

Summary - Contains tiles and a chart.

Rentals - Contains a vertical tab control having three pages - the first is selected, and you can see the corresponding content on the rightmost side.

Statistics - Contains stacked charts.

Related links - Contains a series of grouped menu item links to forms of relevance to this user and activity.

The overall form, as well as each of the sections within, are defined using UX patterns and subpatterns. The corresponding patterns are described in detail in the following sections.

QUESTION 4

A company plans to implement Dynamics 365 Finance Operations (on-premises).

The company has system compliance requirements that must be addressed. You need to design the solution for the company. What should you address in the design?

A. job-protected family and medical leave

B. workers\\' compensation

C. employee retirement

D. data privacy

Correct Answer: D

QUESTION 5

A company is implementing Dynamics 365 Finance. The company plans to implement a self-service environment.

The golden configuration and master data have been copied to the user acceptance testing (UAT) environment. The company is ready for a cutover.

You need to move the UAT configuration and master data to the production environment. What should you do?

A. Import the database from Lifecycle Services (LCS).

B. Create a service request to move the sandbox environment to the production environment.

C. Refresh the database from Lifecycle Services (LCS).

D. Create a service request for the environment deployment.

Correct Answer: C

Perform master data migration

Now that the UAT environment is hydrated with the golden configuration, you can begin to migrate master data.

Self-service

In LCS, open the Full details for the production environment to load the Environment page.

In the Maintain menu, select Move database.

For the operations options, select Refresh database. In the Source environment, select the sandbox where your golden configuration is. Note the important instructions found on the Refresh database page for this operation. Select the check

box to confirm that you understand this operation will overwrite the production database. The operation starts immediately after submitting the request.
