QUESTION 2

HOTSPOT

You need to recommend solutions to meet the CIO\\'s requirements for the customers and the roadmap.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
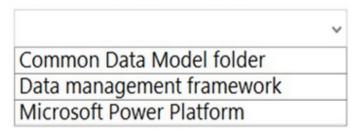

Hot Area:

Answer Area

Requirement	Location
Structure customers for the roadmap.	▾
	Azure Data Lake Storage Gen2
	Azure Data Lake Storage Gen1
	Microsoft Power Platform
	Data management framework
Match old customer IDs to new IDs.	▾
	Common Data Model folder
	Data management framework
	Microsoft Power Platform

Correct Answer:

Answer Area

Requirement	Location
Structure customers for the roadmap.	▾
	Azure Data Lake Storage Gen2
	Azure Data Lake Storage Gen1
	Microsoft Power Platform
	Data management framework
Match old customer IDs to new IDs.	▾
	Common Data Model folder
	Data management framework
	Microsoft Power Platform

Margie\'s Travel wants to enable customer self-service in the future for customers based in the US and UK. This feature is not planned for the initial system rollout; however, the CIO has asked that the roadmap be created for Dynamics 365

Customer Service and Dynamics 365 Commerce applications in the future. In addition, the CIO wants to ensure that the old customer numbers can be matched to a new standardized format.

Box 1: Data management framework

The data management framework supports using data entities in the following core data management scenarios:

Data migration

Set up and copy configurations

Integration

Box 2: Common Data model folder ommon Data Model is built upon a rich and extensible metadata definition system that enables you to describe and share your own semantically enhanced data types and structured tags, capturing valuable business insight which can be integrated and enriched with heterogeneous data to deliver actionable intelligence.

With Common Data Model, you can structure your data to represent concepts and activities that are commonly used and well understood. You can query and analyze that data, reuse it, and interoperate with other businesses and apps that use the same format. Common data model can be used to define thousands of entities such as Customer, Product, Opportunity, Sale, Purchase Order, etc. as well as identifying data for regulatory and compliance purposes.

QUESTION 3

You need to recommend a solution to meet the requirements for the globalization features. Which feature should you recommend?

A. First release program

B. FastTrack program

C. Product Roadmap

D. Release validation program

E. Preview early access program

Correct Answer: A

Note:

*

 The CTO has learned that there are updates to globalization features in Dynamics 365 Finance. The IT staff has been tasked with ensuring that they are the first group to receive these updates.

*

 The IT department has decided not to code for globalization issues because they are in an upcoming service update. They are closing in on go-live and need to make sure that the updates are applied in time.

Service updates are continuous, touchless updates that provide new features and functionality. You are in control and manage how your organization receives these updates.

For example, you can sign up for the First Release program so that your organization receives updates first. You can apply the updates to any of your environments manually (self-update) or remain on the default release schedule and receive

the auto-updates when you schedule them using LCS.

QUESTION 4

An organization is planning to migrate to Dynamics 365 Finance.

The organization reports that the legacy system has failed during peak sessions. You need to recommend an approach that will handle peak session volume.

Which two approaches should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Use performance and load testing.

B. Configure a single box development environment.

C. Perform user integration testing.

D. Optimize server configuration.

Correct Answer: AD

QUESTION 5

You are an architect implementing a Dynamics 365 Finance environment.

You need to analyze test results generated by the development team. Which tool should you use?

A. Trace parser

B. Task Recorder

C. Regression suite automation tool

D. SysTest

Correct Answer: A
