QUESTION 1

You are configuring a new bill of materials (BOM) for a new product. The product is a set of speakers.

You add all of the component items for the product to the BOM lines.

You need to set up the configuration route for the new product to meet the following requirements:

The power of the speakers must depend on the speaker enclosure.

The speaker enclosure must depend on the wiring harness.

What should you do?

A. Create a default configuration route, and then select the speaker enclosure item for the speaker.

B. Include the speaker enclosure and the wiring harness in a configuration rule.

C. Create a new BOM for the speaker enclosure, and then create a new BOM for the wiring harness.

D. Select an item from the wiring harness configuration group, and then from the speaker enclosure.

Correct Answer: B

Example:

We are going to create a bill of material for the \\'FG_ITEM\\'. We want either \\'ITEM_1\\' and \\'ITEM_3\\' OR \\'ITEM_2\\' and \\'ITEM_4\\' to be selected as components for \\'FG_ITEM\\'. For this purpose we will define configuration route and configuration rules

for component selection.

i.Open \\'Bill of materials\\' form from Inventory and warehouse management > Common > Bill of materials

ii.Create new BOM for \\'BOM for FG_ITEM\\'

iii.Add \\'ITEM_1\\', \\'ITEM_2\\' assigning \\'Group_1\\' as Configuration group, and \\'ITEM_3\\' and \\'ITEM_4\\' assigning \\'Group_2\\' as Configuration group in BOM lines.

iv.Click \\'Configuration route\\' tab and add \\'Group_1\\' and \\'Group_2\\'.

v.Select \\'Group_1\\' and click \\'Configuration rules\\'

Etc.

QUESTION 2

You need to identify which type of information you can obtain by performing bill of materials (BOM) calculations? Which three types of information should you identify? Each correct answer presents part of the solution.

A. The projected sales prices and costs of BOM Items manufactured in different quantities

B. The quantity of raw materials required to manufacture the BOM item

C. The projected sales quantity of the BOM item

D. The profit margins and contribution ratios

E. The maximum production run size for the BOM

Correct Answer: ACD

*

 The BOM calculation is performed on the whole BOM structure and for the specified quantity. You can specify how the cost and sales prices should be calculated for each component. You can also change the quantity of the series used in the subBOM.

*

 BOM calculations determine the cost-price and sales prices for the BOM depending on profit settings. BOM calculations determine the estimated BOM prices on all BOM levels. The contribution of a single item or operation to the price of the BOM level can be determined. The contribution of all items and operations on a specific level can also be determined.

*

 The Calculation form is used to calculate a manufactured item\\'s cost and to generate an associated item cost record within a costing version. The Calculation form can also be used to calculate a manufactured item\\'s sales price and to generate an associated item sales price record within a costing version.

QUESTION 3

You need to set up locations for a warehouse that will store finished goods for one of your company\\'s divisions.

What are three possible details that you can specify for the locations? Each correct answer presents a complete solution.

A. The maximum number of pallets

B. The physical dimensions

C. The inventory dimensions

D. The maximum dimensions of the items

E. The maximum weight that can be stored

Correct Answer: ABE

*

 Location properties

A location has the following characteristics:

Size (number of pallets, height, width, and depth)

Pallet type group

Storage area

Picking area

Location type (inbound dock, outbound dock, pick location, or bulk location)

*

 Max. weight

The maximum weight that can be held at the location.

QUESTION 4

You create a new item that has a tracking dimension group. The tracking dimension group includes serial numbers as an active dimension.

You need to configure the item to use automatic allocation of the serial numbers.

What should you create?

A. An item model group

B. A number group

C. A cost group

D. An item group

Correct Answer: B

Serial number group: Select the group that is used for automatic allocation of serial numbers.

QUESTION 5

You need to disable the Stocked setting for a product. Which form should you use?

A. Item group

B. Item model group

C. Storage dimension group

D. Tracking dimension group

Correct Answer: B

Defining products of type service in Microsoft Dynamics AX 2012 is fairly simple. Apart from selecting the correct product type, one essential component to remember is to associate the released product in a legal entity with an item model group, where the policy Stocked product is left blank.

Item model groups (1 - ceu)

File ▾   New   Delete

Item model group ▲	Name
Expense	Expense Products (not stocke
FIFO	FIFO
FIFO_PHY	FIFO w/Physical value
FIFO_QUAR	FIFO w/Auto Quarantine
FRP_PICK	Fixed Receipt Price w/Picking
FRP_QUAR	Fixed Receipt Price w/Auto Q
Lean Serv	Subcontracting services Lean
Lean_STD	Lean_STD
LIFO_PHY	LIFO w/Physical value
LIFOd_PHY	LIFO Date w/physical value
NI	Expensed Items (Non-Stock)
PURCHREQ	Indirect Materials
SERV	Service Items
Services	Standard Services
Std Cost	Standard Cost
SUB	Subcontracting Services Item
WA	Weighted average
WA_PHY	Weighted average w/physica
WA_PHY_NEG	Weighted average w/physica
WAD_PHY	Weighted average date w/ph

Item model group: Expense
Name: Expense Products (not stocked)
