QUESTION 1

You need to set the permissions of an action menu item. Which property should you modify?

A. Web Secure Transaction

B. Needed Access Level

C. Configuration Key

D. Linked Permission Type

Correct Answer: D

Property: LinkedPermissionType

Specifies the type of the object pointed to by the LinkedPermissionObject property.

Property: LinkedPermissionObject

Specifies another object (for example, a form or report) whose permissions are to be applied to this menu item. Typically used with Action menu items.

Incorrect:

Not A: WebSecureTransaction

Select whether the menu item requires secure transactions (SSL). Web menu items only.

Not B: Property: NeededAccessLevel

Define the minimum access required if the menu item is to appear on a menu or a button. This property is used to set access to the menu items for different user groups.

Not C: Property: ConfigurationKey

Select which configuration key is required to enable the menu item. Use the key for the module that the object belongs to.

Reference: Menu Item Properties [AX 2012]

QUESTION 2

You have the following X++ statement:

```
Int counter = 4;
;
Do
{
    while(counter>=3)
    {
        print strfmt("%1", 2);
        break;
    }
        print strfmt("%1", counter);
        counter--;
}
While(counter >= 3);
Pause;
```

You need to identity the output of the statement. What should you identify?

A. 2

B. 4

C. 2

D. 2

Correct Answer: A

QUESTION 3

You have the following X++ code: (Line numbers are included for reference only.)

```
01 public class Class1
02 {
03 int var1;
04 }

05 public void method1()
06 {
07 var1 = 5;
08 }

09 public void method2()
10 {
11 var1 = 10;
12 }

13 public class Class2
14 {
15 }

16 public void method3()
17 {
18 Class1 c1 = new Class1();
19 Class1 c2 = new Class1();
20 c1.method1();
21 c2.method2();
22
23 info("done");
24 }
```

Method l and method2 are in Class l. Method3 is in Class2.

You need to identify the value of var l for the cl object when the execution of the code reaches line 22.

Which value should you identify?

A. 10

B. Undefined

C. 0

D. 5

Correct Answer: D

QUESTION 4

You need to identify which elements the Reverse engineer tool will provide for a data model. Which three elements should you identify? Each correct answer presents part of the solution.

A. Table methods

B. Classes

C. Table fields

D. Base enumerations

E. Extended data types (EDTs)

Correct Answer: CD

The following table lists the elements that are included in the diagram for the UML data model:

*

 (C) Table fields

*

 (D) All base enums

*

 (F) All extended data types Etc.

Note: The Reverse Engineering tool can create the following types of UML models:

*

 UML data model

*

 UML object model

Reference: Reverse Engineering Tool Overview [AX 2012]

QUESTION 5

You need to identify which permission can be set only on a form that has date effective data. Which permission should you identify?

A. Correct

B. Create

C. Delete

D. Read

E. Update

Correct Answer: A

For example, you have a role where you set the PastDataAccess property to Read, the Current- DataAccess to Update, and FutureDataAccess to Delete. The role also includes a privilege that contains a permission to a valid time state table

where the EffectiveAccess property is set to Cor- rect. As a result, the role has read access to past records, update access to current records, and correct access to future records.

Note:

To grant access to the records in a valid time state table, you use the role-based security. You can specify whether a role can view, create, or update records in the table.

* When you add date effective fields to a form, you use one of the following patterns.

Show the current value.

Show a list of editable records.

Show a read-only list of records.

Reference: Date Effective Data Sources for Forms [AX 2012]
