A. int myInt.10;

B. int myInt(10);

C. int myInt[1,10];

D. int myInt; length = 10;

Correct Answer: B

QUESTION 3

Isaac, the systems developer, has noticed that the following code is slow in executing. The code is used to find all customers that have transactions with no document date set.

What steps could he take to increase performance? Choose the two that apply.

A. Add a new index to CustTrans containing the field DocumentDate

B. Add a new index to CustTable containing the field DoceumentDate

C. Rewrite the code so that it contains a nested loop rather than a join

D. Change the join to an exists join.

Correct Answer: AD

QUESTION 4

What is true about Table Views? Choose the two that apply.

A. A view can improve performance by only retrieving the required fields

B. A view can only contain two tables

C. You must always create an index on a view

D. A view can be used in a grid on a form

Correct Answer: AD

QUESTION 5

When is it appropriate to define table relations directly on tables instead of using the extended data types?

A. When one field in a table relates to one field in another table.

B. When multiple fields in a table define one relation to multiple fields in another table.

C. When one field in a table relates to multiple fields in another table.

D. Never; relations should always be set up on the extended data types.

Correct Answer: B
