### QUESTION 1

When you manufacture prototypes, it is desirable to have all ledger transactions posted to separate ledger accounts specifically created for prototype accounting.

Which of the following accomplishes this with the fewest new settings?

- A. Keep a log of used voucher numbers in the prototypes.
- B. Create an item group for prototype items with separate accounts and set up cost categories for the work centers.
- C. Create production groups with separate accounts for prototype production orders.
- D. Create special journals with separate ledger accounts for posting the prototype productions.

Correct Answer: C

---

### QUESTION 2

An item in inventory is stored in packages of four pieces in airtight containers. After the container is broken, any excess items must be discarded.

How can you ensure that a whole number of packages is issued, regardless of the production size?

- A. Set up a scrap on the work center to a constant of three.
- B. Set up a scrap on the route to a variable of four.
- C. Round up the consumption in the picking list journal to a multiple of four.
- D. Enter scrap as a multiple of four in the picking list journal.

Correct Answer: C

---

### QUESTION 3

A production order goes through a series of updating jobs, step by step. The stage or states of a production is called the Production order status.

Which of the following Production order status statements is true?

- A. The names assigned to the states are in alphabetical order to make it easier to recall the correct sequence.
- B. An authorized user can update the production order status from Created to Report as finished, skipping all of the updating jobs in between.
- C. When a Scheduled production orders BOM is modified, the production order is already cost estimated, so there is no

way you can update the estimated cost.

D. Prior to a production order being Ended, you can reset the production order status to a previous status in the cycle.

Correct Answer: D

---

#### QUESTION 4

You need to produce a prototype item similar to an existing item you currently produce. The new prototype item will be the same as the existing item, but will have one half the quantity of one of the BOM components.

How can you efficiently produce the prototype item using the BOM from the existing item with the least impact to the existing BOM? Choose the 2 that apply.

- A. Modify the BOM for the existing item, select the BOM to produce the prototype item, then modify the BOM again back to the original.
- B. Create the production order and select the BOM for the existing item then edit the BOM from the production order.
- C. Use the BOM for the existing item and create a picking list with the correct quantity of BOM items.
- D. Use the BOM for the existing item and change the production order quantity to half the quantity required.

Correct Answer: BC

---

#### QUESTION 5

Which of the following actions is not possible in the BOM Designer?

- A. An user can drag an item from the Items table and drop in the current BOM-tree.
- B. An user can drag an item from the BOM tree and drop it in the route to indicate which operation the item is used in.
- C. A user can delete BOM lines from the BOM.
- D. A user can see all related items by clicking on the operation in the route.

Correct Answer: D
