QUESTION 1

When calculating a sales price for a BOM from a sales order line, where can you select the profit- setting?

- A. In the Inventory management parameters
- B. On the BOM lines
- C. In the BOM report as finished journal
- D. In the BOM calculation

Correct Answer: D

QUESTION 2

One of your company's work centers is going to be used for two hours in each eight-hour shift for training. Your company uses operations scheduling. What adjustment must you make for this work center so only six hours of production work are planned for this work center shift?

- A. Set the efficiency percentage to 25.
- B. Set the operations scheduling percentage to 75.
- C. Set the capacity to six.
- D. Set the run time to six.

Correct Answer: B

QUESTION 3

Which of the following statements reflect the differences between Operation scheduling and Job scheduling in Microsoft Dynamics AX 2009? Choose the 2 that apply.

- A. Operation scheduling uses forward scheduling only, while Job scheduling can use any of the 12 available scheduling directions.
- B. Operation scheduling is date scheduled and Job scheduling is date and time scheduled.
- C. When an operation specifies a work center group, Operation scheduling schedules to the work center group and Job scheduling schedules to a specific work center.
- D. Operation scheduling uses unlimited capacity and Job scheduling uses limited capacity.

Correct Answer: BC

QUESTION 4

Which of the following kinds of set up information are required in other modules, before you can use the Production module? Choose the 2 that apply.

- A. Company information
- B. Items
- C. Journal names
- D. Routes

Correct Answer: AB

QUESTION 5

You need to produce a prototype item similar to an existing item you currently produce. The new prototype item will be the same as the existing item, but will have one half the quantity of one of the BOM components.

How can you efficiently produce the prototype item using the BOM from the existing item with the least impact to the existing BOM? Choose the 2 that apply.

- A. Modify the BOM for the existing item, select the BOM to produce the prototype item, then modify the BOM again back to the original.
- B. Create the production order and select the BOM for the existing item then edit the BOM from the production order.
- C. Use the BOM for the existing item and create a picking list with the correct quantity of BOM items.
- D. Use the BOM for the existing item and change the production order quantity to half the quantity required.

Correct Answer: BC
