QUESTION 1

A junior programmer asks you to review an order of operator precedence so that a math operation evaluates appropriately. Which list is ordered correctly?

A. unary, multiplicative, additive, logical, relational

B. unary, multiplicative, additive, relational, logical

C. shift, relational, additive, unary, logical

D. equality, multiplicative, additive, relational, unary

Correct Answer: B

Reference: https://docs.microsoft.com/en-us/dynamics365/unified-operations/dev-itpro/dev-ref/xpp-operator-precedence

QUESTION 2

You create a new table with the Valid Time State Field Type property set to Date. You add the table as a singular data source to a form, and create a display menu item that opens the form.

You add the menu item as an entry point to a new privilege and want to ensure that a role with the privilege can edit records without creating new records.

To achieve this goal, what is the minimum access level you should grant to the entry point?

A. Create

B. Delete

C. Correct

D. Update

Correct Answer: D

QUESTION 3

Developers on your team need to use IntelliSense during the coding process by supplying a list of potential elements from the Application Object Tree (AOT).

Because you are converting from an earlier version of the MorphX environment that did not have InteliSense, you need to explain advantages of InteliSense to the development team.

Which two descriptions should you provide to your team? Each correct answer presents a complete solution.

A. It helps maintain consistent spelling of elements.

B. It prompts the user for known methods and possible choices.

C. It consumes assemblies directly within the application.

D. It can efficiently reference classes that are available in other .NET assembly DLL files.

Correct Answer: BD

QUESTION 4

You are an Independent Software Vendor (ISV) developer who is responsible for maintaining code for a solution. During code review, the reviewer identifies the following block of code:

```
private void processLineFromFile (str _lineFromFile)
{
      str lineType = this.lineTypeFromLine(_lineFromFile);

      switch (lineType)
      {
            case 'I':
                  this.processItemLineFromFile(_lineFromFile);
                  break;
            case 'S':
                  this.processServiceLineFromFile(_lineFromFile);
                  break;
            case 'R':
                  this.processReturnLineFromFile(_lineFromFile);
                  break;
            default:
                  throw error("@XYZ:InvalidLineErrorMsg");
      }
}
```

Pass4itsure.com

The reviewer requests that you improve readability by removing hard coded values in the code.

Which two steps should you take to fulfill the request? Each correct answer presents part of the solution.

A. Add the following lines to the beginning of the class

```
#define.ItemLine(' I ')
#define.ServiceLine(' S ')
#define.ReturnLine(' R ')
```

B. Make the following changes to the case statement lines:

"case 'I' : " to "case Macro: :ItemLine:"

"case 'S' :" to "case Macro: :ServiceLine:"

"case 'R' :" to "case Macro: :ReturtnLine:"

C. Make the following changes to the case statement lines:

"case 'I' :" to "case ItemLine:"

"case 'S' :" to "case ServiceLine:"

"case 'R' :" to "case ReturnLine:"

D. Add the following lines to the beginning of the class:

```
const str Itemline = 'I' ;
const str ServiceLine = 'S' ;
const str ReturnLine = 'R' ;
```

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: CD

QUESTION 5

You are an Independent Software Vendor (ISV) developer and are reviewing another developer\\'s changes to a project.

You run the Best Practices Fixer on the project. The following error message appears in the error list in Visual Studio for the display menu item XYZ:

BP Rule: [BPErrorMenuItemNotCoveredByPrivilege]:Path:[dynamics://MenuItemDisplay/XYZ]:BPErrorMenuItemNotCoveredByPrivilege: `AxMenuItemDisplay\\' `XYZ\\' is not covered by privilege. XYZ (USR) [YourModule]

Based on this error message, which recommendation should you make to the developer?

A. Add the XYZ display menu item to the Entry Points of an extension of an existing Security Privilege in the Application Suite model.

B. Set the Create Permission and Delete Permissions properties on the XYZ display menu item.

C. Set the Linked Permission Type property to Form, and the Linked Permission Object property to the name of the form on the XYZ display menu item.

D. Add the XYZ display menu item to the Entry Points of a new or existing Security Privilege in the YourModule model.

Correct Answer: D
