QUESTION 1

You are working for a client who has a cloud-hosted production system on Microsoft Dynamics 365 for Finance and Operations.

The client requests for you to apply to a package to the Production environment.

What should you do?

- A. Log onto each Production AOS cloud-hosted server, and use ModelUtil.exe to import the package into the Production model store.
- B. Generate a runbook for the package by using AXUpdateInstaller.exe, and execute the runbook on each Production AOS cloud-hosted server.
- C. Log into Lifecycle Services (LCS) for the client's project, view the details for the Production environment, click on Maintain, and then Apply updates.
- D. Log into Lifecycle Services (LCS) for the client's project, click on Service requests, and, then create a service request to apply the package.

Correct Answer: C

QUESTION 2

You create a new form to allow users to edit records in the Customer table.

You need to prevent users from deleting any customer records.

What should you do to achieve this goal?

- A. On the CustTable data source on the form, set the Allow Delete property to No.
- B. Remove the Delete command button from the form.
- C. On the form design, set the View Edit Mode property to View.
- D. Implement an OnDeleted event handler to prevent the deletion.
- E. Set Allow Document Deleted Before dates for the records.

Correct Answer: A

QUESTION 3

You are working for a client in an existing Microsoft Dynamics 365 for Finance and Operations environment. The client requests a security change on a form named Form1 that already exists in the environment. Form1 contains a single data

source and a grid object. The grid object queries on the data source.

Form1 also has the following buttons located in the Action pane:

one with the Name property set to CreateRecord, which creates new records in the data source,

one with the Name property set to DeleteRecord, which deletes records in the data source, and

one with the Name property set to RunMethod.

There is a Display Menu Item with the Name property set to OpenForm1, the ObjectType property set to Form, and the Object property set to Form1. You need to create a privilege that allows roles containing the privilege to delete records on

the form, but denies access to the RunMethod button.

You create a new privilege named NewPrivilege1, and you add OpenForm1 as an entry point to NewPrivilege1. You set the AccessLevel to Delete on the OpenForm1 entry point.

Which value should you set on the NeededPermission property on the RunMethod button?

- A. Create
- B. Manual
- C. Correct
- D. Delete

Correct Answer: B

QUESTION 4

You are an Independent Software Vendor (ISV) developer adding functionality to an existing solution. The solution's model has a label file of XYZen-US.label.txt.

You finish creating a job and an action menu item to launch the job.

You need to create a new label in the label file for the menu item.

Which two steps are recommended when creating the label? Each correct answer presents part of the solution.

- A. Search for the text of the new label to ensure there are no duplicates.
- B. Give the new label a meaningful Label ID after clicking the New button.
- C. Use all capital letters and numbers for the Label ID of the new label.
- D. Use the Label ID generated by the editor after clicking the New button.

Correct Answer: AD

QUESTION 5

You are a developer and want to create an extension of an existing Extended Data Type (EDT) that is a string primitive data type. Which two EDT properties are extendable? Each correct answer presents a complete solution.

- A. String Size
- B. Presence Method
- C. Display Length
- D. Form Help
- E. IsExtensible

Correct Answer: AD
