Correct Answer: D

QUESTION 5

You work in an International company and you are a developer of Microsoft Dynamics NAV 5.0. You are designing a report. When the report is being run, other users are inserting records into the same transaction tables. The SQL Server Option for Microsoft Dynamics NAV you are using is not version-based. You have to ensure that the data reported will be a consistent snapshot of the data in those transaction tables, what should you do to the report?

A. You cannot do anything. While he is printing this report, the user will just have to ask all the other users not to make any entries.

B. There\\'s no need for you to do anything. There are no conflicting versions, and all reports print a consistent snapshot of the data as SQL Server is not version-based.

C. The TransactionType property of the report has to be set to "Browse." By this way, when the report is printing, other users\\' entries will not be taken into account.

D. The TransactionType property of the report has to be set to "Snapshot." By this way, when the report is printing, users who try to make entries will be locked out.

Correct Answer: D
