2 / 8

QUESTION 1

HOTSPOT

You have an Azure Active Directory (Azure AD) tenant that contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	Member of
Device1	Windows 10	Group1
Device2	Android	Group1
Device3	iOS	Group2

From Intune, you create and send a custom notification named Notification1 to Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Statements	Yes	No
User1 receives Notification1 on Device1.	○	○
User2 receives Notification1 on Device2.	○	○
User1 receives Notification1 on Device3.	○	○

Correct Answer:

Statements	Yes	No
User1 receives Notification1 on Device1.	○	○
User2 receives Notification1 on Device2.	○	○
User1 receives Notification1 on Device3.	○	○

Box 1: No Windows 10 devices cannot receive notifications.

Custom notifications can be visible on lock screens on both iOS/iPadOS and Android devices depending on device settings

Box 2: No User2 is in the wrong group. Only Group1 receives notifications.

Note: Sending a notification to a group will target only the users of that group; the notification will go to all iOS/iPadOS and Android devices enrolled by that user.

Box 3: Yes User1 is in the right group and Device3 has the right OS.

https://docs.microsoft.com/en-us/mem/intune/remote-actions/custom-notifications

QUESTION 2

You have a Microsoft 365 E5 subscription that contains 1,000 Windows 11 devices. All the devices are enrolled in Microsoft Intune.

You plan to integrate Intune with Microsoft Defender for Endpoint.

You need to establish a service-to-service connection between Intune and Defender for Endpoint.

Which settings should you configure in the Microsoft Endpoint Manager admin center?

A. Connectors and tokens

B. Premium add-ons

C. Microsoft Tunnel Gateway

D. Tenant enrollment

Correct Answer: A

Microsoft Defender for Endpoint Important Service and Endpoint Settings You Should Configure Right Now.

As a prerequisite, however, head to tenant administration > connectors and tokens > Microsoft Defender for Endpoint and confirm the connection is enabled. You previously set this up in the advanced settings of Microsoft 365 Defender.

QUESTION 3

You have an Azure Active Directory (Azure AD) tenant that contains the named locations shown in the following table.

Name	Location type	Configuration
Location1	IP ranges	40.77.182.32/27
Location2	Countries (IP)	Canada
Location3	IP ranges	2a01:111::/32
Location4	Countries (IP)	Australia Include unknown countries/regions
Location5	Countries (GPS)	United States

You need to create a Conditional Access policy that will have a condition to include only trusted locations. Which two named locations can be marked as trusted? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. Location1
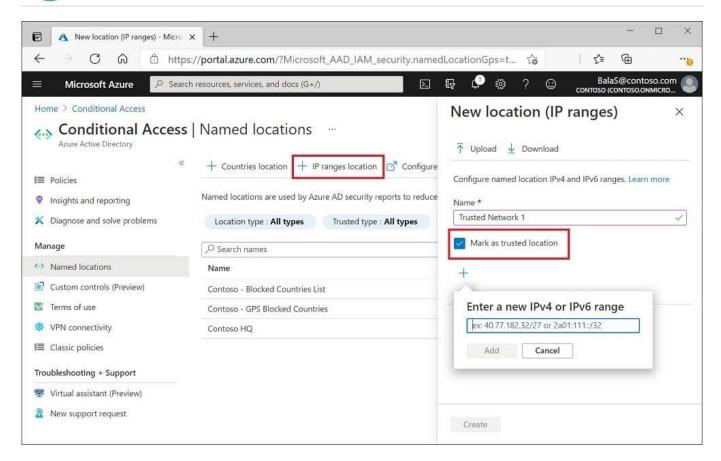

B. Location2

C. Location3

D. Location4

E. Location5

Correct Answer: AC

Trusted locations Administrators can name locations defined by IP address ranges to be trusted named locations

A: An IPv4 named location can be marked as trusted.

C: An IPv6 named location can be marked as trusted.

Reference: https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition

QUESTION 4

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Statements	Yes	No
If User1 adds a shortcut to the desktop of Device1, when User1 signs in to Device3, the same shortcut will appear on the desktop.	○	○
If User1 sets the desktop background to blue on Device2, when User1 signs in to Device4, the desktop background will be blue.	○	○
If User2 increases the size of the font in the command prompt of Device2, when User2 signs in to Device3, the command prompt will show the increased font size.	○	○

Correct Answer:

Statements	Yes	No
If User1 adds a shortcut to the desktop of Device1, when User1 signs in to Device3, the same shortcut will appear on the desktop.	●	○
If User1 sets the desktop background to blue on Device2, when User1 signs in to Device4, the desktop background will be blue.	○	●
If User2 increases the size of the font in the command prompt of Device2, when User2 signs in to Device3, the command prompt will show the increased font size.	○	●

QUESTION 5

You have a Microsoft 365 subscription. All devices run Windows 10.

You need to prevent users from enrolling the devices in the Windows Insider Program.

What two configurations should you perform from the Endpoint Management admin center?

Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. a Windows 10 security baseline

B. an app configuration policy

C. a custom device configuration profile

D. a Windows 10 update ring

E. a device restrictions device configuration profile

Correct Answer: CD

C: Microsoft Intune includes many built-in settings to control different features on a device. You can also create custom profiles, which are created similar to built- in profiles. Custom profiles are great when you want to use device settings and features that aren\\'t built in to Intune. These profiles include features and settings for you to control on devices in your organization. For example, you can create a custom profile that sets the same feature for every Windows device.

D: Set up Insider Preview builds using Intune

1.

 Log in to the Azure portal and select Intune.

2.

 Go to Software Updates > Windows 10 Update Rings and select + Create to make an Update Ring policy. Add a name and select the Settings section to configure its settings.

3.

 Etc.
