QUESTION 1

You use a Microsoft Intune subscription to manage iOS devices.

You configure a device compliance policy that blocks jailbroken iOS devices.

You need to enable Enhanced jailbreak detection.

What should you configure?

A. the Compliance policy settings

B. the device compliance policy

C. a network location

D. a configuration profile

Correct Answer: B

Compliance policy settings include the following settings: Enhanced jailbreak detection (applies only to iOS/iPadOS) Etc.

Reference: https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started

QUESTION 2

Your network contains an Active Directory domain named contoso.com. The domain contains 25 computers that run Windows 11.

You have a Microsoft 365 subscription

You have an Azure AD tenant that syncs with contoso.com.

You configure hybrid Azure AD join and discover that some of the computers have a registered state of Pending.

You need to ensure that the computers complete the join successfully.

What should you ensure?

A. that Windows is activated on all the computers

B. that the users of the computers are assigned Microsoft 365 licenses

C. that each computer has a line of sight to a domain controller

D. that the computers contain the latest quality updates

Correct Answer: C

Pending devices in Azure Active Directory

How a device gets stuck in a pending state:

There are two scenarios in which a device can be stuck in a pending state.

Sync a new on-premises domain joined device to Azure AD

A new on-premises device can get stuck in a pending state if it can\\'t complete the device registration process. This problem can be caused by several factors, such as that the *device can\\'t connect to the registration service*.

To troubleshoot a device registration problem, see:

Troubleshooting hybrid Azure Active Directory joined devices

*-> Test Device Registration Connectivity

Note: Pending devices are devices that are synced to Azure Active Directory (Azure AD) from your on-premises Active Directory, but haven\\'t completed registration with the Azure AD device registration service. When the registered state of a

device is pending, the device can\\'t complete any authorization or authentication requests, such as requesting a Primary Refresh token for single sign-on, or applying device-based Conditional Access policies.

QUESTION 3

You have a Microsoft 365 E5 subscription and 25 Apple iPads.

You need to enroll the iPads in Microsoft Intune by using the Apple Configurator enrollment method.

What should you do first?

A. Configure an Apply MDM push certificate.

B. Add your user account as a device enrollment manager (DEM).

C. Modify the enrollment restrictions.

D. Upload a file that has the device identifiers for each iPad.

Correct Answer: A

Set up iOS/iPadOS device enrollment with Apple Configurator

Prerequisites

Physical access to iOS/iPadOS devices

Set MDM authority

An Apple MDM push certificate

Device serial numbers (Setup Assistant enrollment only)

USB connection cables

macOS computer running Apple Configurator 2.0

Note:

Upload and renew your Apple MDM push certificates in Microsoft Intune. An Apple MDM Push certificate is required to manage iOS/iPadOS and macOS devices in Microsoft Intune, and enables devices to enroll via:

The Intune Company Portal app.

Apple bulk enrollment methods, such as the Device Enrollment Program, Apple School Manager, and Apple Configurator.

Certificates must be renewed annually.

QUESTION 4

Your company uses Microsoft Intune.

More than 500 Android and iOS devices are enrolled in the Intune tenant.

You plan to deploy new Intune policies. Different policies will apply depending on the version of Android or iOS installed on the device.

You need to ensure that the policies can target the devices based on their version of Android or iOS.

What should you configure first?

A. groups that have dynamic membership rules in Azure AD

B. Device categories in Intune

C. Corporate device identifiers in Intune

D. Device settings in Azure AD

Correct Answer: A

We can create dynamic groups by using the deviceOSVersion or deviceOSType properties, and then apply Intune configuration policies to those groups.

Reference: https://docs.microsoft.com/en-us/archive/blogs/pauljones/dynamic-group-membership-in-azure-active-directory-part-2 https://docs.microsoft.com/en-ie/mem/intune/enrollment/device-group-mapping

QUESTION 5

You install a feature update on a computer that runs Windows 10. How many days do you have to roll back the update?

A. 5

B. 10

C. 14

D. 30

Correct Answer: B

Microsoft has changed the time period associated with operating system rollbacks with Windows 10 version 1607, decreasing it to 10 days. Previously, Windows 10 had a 30-day rollback period.
