**QUESTION 1**

You need to consider the underlined segment to establish whether it is accurate.

Your company has recently acquired a new sales application.

You navigate to the Discovered apps page in Cloud Discovery via Microsoft Cloud App Security to check the application score. You then notice that a number of the applications have a low score as a result of omitted domain registration and consumer popularity data.

You want to make sure that the score is not affected by the omitted data.

You have to configure app tags via the Cloud Discover settings

Select No adjustment required if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

What should you configure from the?

- A. No adjustment required
- B. a label
- C. App Connector flow
- D. a custom key

Correct Answer: A

QUESTION 2**HOTSPOT**

You have a Microsoft 365 tenant that contains a Microsoft Power Platform development environment named Dev1, a Power Platform production environment named Prod1, and two users named User1 and User2.

You need to assign roles to the users to meet the following requirements:

1.

User1 must have full access permissions to Dev1 and Prod1.

2.

User2 must be able to acquire and assign Microsoft Power BI licenses.

The solution must use the principle of least privilege.

Which role should you assign to each user? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

User1:

	▼
Power BI admin	
Environment admin	
Environment maker	
Power Platform admin	

User2:

	▼
Power BI admin	
Environment admin	
Power Platform admin	
Microsoft 365 Global admin	

Correct Answer:

Answer Area

User1:

	▼
Power BI admin	
Environment admin	
Environment maker	
Power Platform admin	

User2:

	▼
Power BI admin	
Environment admin	
Power Platform admin	
Microsoft 365 Global admin	

Reference: <https://docs.microsoft.com/en-us/power-bi/admin/service-admin-licensing-organization>
<https://docs.microsoft.com/en-us/microsoft-365/admin/add-users/about-admin-roles?view=o365-worldwide>

QUESTION 3

HOTSPOT

Your company has a Microsoft 365 subscription that contains the following domains: Contoso.onmicrosoft.com
Contoso.com

You plan to add the following domains to Microsoft 365 and to use them with Exchange Online:

1.

Sub1.contoso.onmicrosoft.com

2.

Sub2.contoso.com

3.

Fabrikam.com

You need to identify the minimum number of DNS records that must be added for Exchange Online to receive inbound email messages for the three domains.

How many DNS records should you add? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

MX records:

	▼
0	
1	
2	
3	

CNAME records:

	▼
0	
1	
2	
3	

Correct Answer:

Answer Area

MX records:

	▼
0	
1	
2	
3	

CNAME records:

	▼
0	
1	
2	
3	

Box 1: 2 You don't need to verify Sub1.contoso.onmicrosoft.com because the onmicrosoft.com domain and DNS is managed by Microsoft. You also don't need to configure an MX record for Sub1.contoso.onmicrosoft.com because that

will be done by Microsoft.

For sub2.contoso.com, you don't need to verify the domain because you have already verified its parent domain contoso.com. However, you do need an MX record to direct email for that domain to Exchange Online.

For Fabrikam.com, you will need to verify the domain. You will need an MX record to direct email for that domain to Exchange Online.

Box 2: 0 You 'should' create CNAME records for autodiscover to point your email clients to Exchange Online to connect to the mailboxes. However, you don't have to. You could configure the email client manually. Therefore, the minimum number of CNAME records required is zero.

QUESTION 4

HOTSPOT

You have several devices enrolled in Microsoft Intune.

You have a Microsoft Azure Active Directory (Azure AD) tenant that includes the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1, Group2
User3	None

The device type restrictions in Intune are configured as shown in the following table.

Priority	Name	Allowed platform	Assigned to
1	Policy1	Android, iOS, Windows (MDM)	None
2	Policy2	Windows (MDM)	Group2
3	Policy3	Android, iOS	Group1
Default	All users	Android, Windows (MDM)	All users

You add User3 as a device enrollment manager in Intune.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer Area**

Statements	Yes	No
User1 can enroll Windows devices in Intune.	<input type="radio"/>	<input type="radio"/>
User2 can enroll Android devices in Intune.	<input type="radio"/>	<input type="radio"/>
User3 can enroll iOS devices in Intune.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statements	Yes	No
User1 can enroll Windows devices in Intune.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can enroll Android devices in Intune.	<input type="radio"/>	<input checked="" type="radio"/>
User3 can enroll iOS devices in Intune.	<input checked="" type="radio"/>	<input type="radio"/>

Box 1:

No. User1 is in Group1. The two device type policies that apply to Group1 are Policy3 and the Default (All Users) policy. However, Policy3 has a higher priority than the default policy so Policy3 is the only effective policy. Policy3 allows the enrolment of Android and iOS devices only, not Windows.

Box 2:

No. User2 is in Group1 and Group2. The device type policies that apply to Group1 and Group2 are Policy2, Policy3 and the Default (All Users) policy. However, Policy2 has a higher priority than Policy 3 and the default policy so Policy2 is the only effective policy. Policy2 allows the enrolment of Windows devices only, not Android.

Box 3:

Yes. User3 is a device enrollment manager. Device restrictions do not apply to a device enrollment manager.

<https://docs.microsoft.com/en-us/intune/enrollment/enrollment-restrictions-set>

QUESTION 5

Your company has an Enterprise E5 subscription of Microsoft 365.

You have been tasked with making sure that sales department users are compelled to make use of multi-factor authentication for all cloud-based applications.

Which of the following actions should you take?

- A. You should create an DLP.
- B. You should create a new app registration.
- C. You should create a session policy.
- D. You should create a sign-in risk policy.

Correct Answer: D
