QUESTION 1

Your network contains an on-premises Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD) as shown in the following two exhibits.

Microsoft Azure Active Directory Connect

Azure AD attributes

These attributes will be exported to Azure AD based on the previously selected application. Remove an individual attribute only if required to meet string organizational security policy.

EXPORTED ATTRIBUTES

- domainNetBios
- employeeID
- extensionAttribute1
- extensionAttribute10
- extensionAttribute11
- extensionAttribute12
- extensionAttribute13
- extensionAttribute14
- extensionAttribute15
- extensionAttribute2
- extensionAttribute3
- extensionAttribute4

I want to further limit the attributes exported to Azure AD. ?

View the list of attribute as comma-separated values

Previous Next

Microsoft Azure Active Directory Connect

Tasks

- Connect to Azure AD
- Sync
 - Connect Directories
 - Domain/OU Filtering
 - Optional Features
 - Azure AD Apps
 - Azure AD Attributes**
 - Directory Extensions
- Configure

Directory extensions

Synchronize directory extension attributes from on-premises to Azure AD to make them available to cloud-based apps.

Available Attributes

- accountExpires (user) [LargeInteger]
- accountNameHistory (group) [String]
- accountNameHistory (user) [String]
- aCSPolicyName (user) [String]
- adminCount (group) [Integer]
- adminCount (user) [Integer]
- adminDescription (group) [String]
- adminDescription (user) [String]
- adminDisplayName (group) [String]
- adminDisplayName (user) [String]
- altSecurityIdentities (group) [String]
- altSecurityIdentities (user) [String]

Selected Attributes

- extensionAttribute10 (user) [String]
- extensionAttribute12 (user) [String]

Previous Next

You create a user named User1 in Active Directory as shown in the following exhibit.

Attribute	Value
employeeType	<not set>
enabledProtocols	<not set>
expirationTime	<not set>
extensionAttribute1	Value1
extensionAttribute10	Value10
extensionAttribute11	Value11
extensionAttribute12	Value12
extensionAttribute13	<not set>
extensionAttribute14	<not set>
extensionAttribute15	<not set>
extensionAttribute2	<not set>
extensionAttribute3	<not set>
extensionAttribute4	<not set>
extensionAttribute5	<not set>

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
The value of extensionAttribute1 is synchronized to Azure AD.	<input type="radio"/>	<input type="radio"/>
The value of extensionAttribute10 is synchronized to Azure AD.	<input type="radio"/>	<input type="radio"/>
The value of extensionAttribute11 is synchronized to Azure AD.	<input type="radio"/>	<input type="radio"/>
The value of extensionAttribute12 is synchronized to Azure AD.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statements	Yes	No
The value of extensionAttribute1 is synchronized to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>
The value of extensionAttribute10 is synchronized to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>
The value of extensionAttribute11 is synchronized to Azure AD.	<input type="radio"/>	<input checked="" type="radio"/>
The value of extensionAttribute12 is synchronized to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>

The Azure AD Attributes page shows which attributes will be synchronized based on the Office 365 services you are using (Exchange, SharePoint etc). We can see that ExtensionAttribute10 and ExtensionAttribute11 have been deselected.

The Directory Extensions page shows which additional attributes will be synchronized (additional to the list in the Azure AD Attributes page).

ExtensionAttribute1:

Will be synchronized because it is ticked in the Azure AD Attributes page.

ExtensionAttribute10.

Will be synchronized because although it is unticked in the Azure AD Attributes page, it is added again in the Directory Extensions page.

ExtensionAttribute11.

Will not be synchronized because it is unticked in the Azure AD Attributes page and it is not added again in the Directory Extensions page.

ExtensionAttribute12:

Will be synchronized because it is ticked in the Azure AD Attributes page. It is also added again in the Directory Extensions page but this will have no effect as it is already ticked in the Azure AD Attributes page.

QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory forest named contoso.com. The forest contains the following domains:

1.

Contoso.com

2.

East.contoso.com

An Azure AD Connect server is deployed to contoso.com. Azure AD Connect syncs to an Azure Active Directory (Azure AD) tenant.

You deploy a new domain named west.contoso.com to the forest.

You need to ensure that west.contoso.com syncs to the Azure AD tenant.

Solution: You create an Azure DNS zone for west.contoso.com. On the on-premises DNS servers, you create a conditional forwarder for west.contoso.com.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 3

Your company uses email, calendar, contact, and task services in Microsoft Outlook.com.

You purchase a Microsoft 365 subscription and plan to migrate all users from Outlook.com to Microsoft 365.

You need to identify which user data can be migrated to Microsoft 365.

Which type of data should you identify?

- A. task
- B. email
- C. calendar
- D. contacts

Correct Answer: B

You can use the Internet Message Access Protocol (IMAP) to migrate user email from Gmail, Exchange, Outlook.com, and other email systems that support IMAP migration. When you migrate the user's email by using IMAP migration, only the items in the user's inbox or other mail folders are migrated. Contacts, calendar items, and tasks can't be migrated with IMAP, but they can be by a user.

Reference: <https://docs.microsoft.com/en-us/exchange/mailbox-migration/mailbox-migration#migrate-email-from-another-imap-enabled-email-system>

QUESTION 4

You have several Microsoft SharePoint document libraries in your on-premises environment.

You have a Microsoft 365 tenant that has directory synchronization implemented.

You plan to move all the document libraries to SharePoint Online.

You need to recommend a migration strategy for the document libraries.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Use the SharePoint Migration Tool to migrate the SharePoint data.

Create new SharePoint sites.

Run azcopy.exe to migrate the SharePoint data.

Create a Microsoft Azure Storage account.

Create new SharePoint libraries.

Answer Area

Correct Answer:

**Actions**

Run azcopy . exe to migrate the SharePoint data.
Create a Microsoft Azure Storage account.

Answer Area

Create new SharePoint sites.
Create new SharePoint libraries.
Use the SharePoint Migration Tool to migrate the SharePoint data.

The SharePoint Migration Tool lets you migrate content to SharePoint Online and OneDrive from the following locations:

1.
SharePoint Server 2013
2.
SharePoint Server 2010
3.
Network and local file shares

The first step is to create new SharePoint sites in SharePoint online. These sites will host the document libraries which will host the migrated content.

The second step is to create the document libraries in the SharePoint sites to host the migrated content.

The final step is to use the SharePoint Migration Tool to migrate the content.

Reference:

<https://docs.microsoft.com/en-us/sharepointmigration/how-to-use-the-sharepoint-migration-tool>

QUESTION 5

You have a Microsoft 365 subscription that uses a default named contoso.com. Three files were created on February 1, 2019, as shown in the following table.

Name	Stored in
File1	Microsoft OneDrive
File2	A Microsoft SharePoint library
File3	Microsoft Exchange Online email

On March 1, 2019, you create two retention labels named Label1 and label2.

The settings for Label1 are configured as shown in the Label1 exhibit. (Click the Label1 tab.) Label 1

Label settings

Retention (i)

On

When this label is applied to content...

Retain the content (i)

For this long... years

Do you want us to delete it after this time?

Delete the content automatically. (i)

Trigger a disposition review. (i)

Notify these people when there are items ready to review

Nothing. Leave the content as is. (i)

Don't retain the content. Just delete it if it's older than (i)

years

Retain or delete the content based on (i)

Label classification

Use label to classify content as a "Record" (i)

The settings for Label2 are configured as shown in the Label1 exhibit. (Click the Label2 tab.) Label 2

Label settings

Retention (i)

On

When this label is applied to content...

Retain the content (i)

For this long... years

Don't retain the content. Just delete it if it's older than (i)

years

Retain or delete the content based on (i)

You apply the retention labels to Exchange email, SharePoint sites, and OneDrive accounts. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
File1 will be deleted automatically on February 1, 2020.	<input type="radio"/>	<input type="radio"/>
If User1 does not complete the disposition review within 90 days of receiving the notification, File2 will be deleted automatically after February 1, 2021.	<input type="radio"/>	<input type="radio"/>
File3 will be deleted automatically after February 1, 2021.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statements

Yes

No

File1 will be deleted automatically on February 1, 2020.

If User1 does not complete the disposition review within 90 days of receiving the notification, File2 will be deleted automatically after February 1, 2021.

File3 will be deleted automatically after February 1, 2021.

Box 1: No Retention overrides deletion.

Box 2: No

Content in a document library will be moved to the first-stage Recycle Bin within 7 days of disposition, and then permanently deleted another 93 days after that. Thus 100 days in total.

Box 3: No

Items in an Exchange mailbox will be permanently deleted within 14 days of disposition.
