### QUESTION 1

To which Azure AD role should you add User4 to meet the security requirement?

- A. Password administrator
- B. Global administrator
- C. Security administrator
- D. Privileged role administrator

Correct Answer: B

User4 must be able to reset User3 password.

User3 is assigned the Customer Lockbox Access Approver role. Only global admins can reset the passwords of people assigned to this role as it's considered a privileged role.

### QUESTION 2

DRAG DROP

Your company has a hybrid deployment of Azure Active Directory (Azure AD).

You purchase a Microsoft 365 subscription.

You plan to migrate the Home folder of each user to Microsoft 365 during several weeks. Each user has a device that runs Windows 10.

You need to recommend a solution to migrate the Home folder of five administrative users as quickly as possible.

Which three actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

**Actions**

**Answer Area**

- Instruct the users to run gpupdate.exe /force at a command prompt on each device.
- From Group Policy Management Editor, configure the OneDrive settings.
- Copy the OneDrive Administrative Templates to your computer.
- From Group Policy Management Editor, configure the Folder Redirection settings.
- Deploy the Azure File Sync agent to all devices.
- From SharePoint Online, create 10 libraries.

Correct Answer:

**Actions**

**Answer Area**

- 
- 
- 
- From Group Policy Management Editor, configure the Folder Redirection settings.
- Deploy the Azure File Sync agent to all devices.
- From SharePoint Online, create 10 libraries.

- Copy the OneDrive Administrative Templates to your computer.
- From Group Policy Management Editor, configure the OneDrive settings.
- Instruct the users to run gpupdate.exe /force at a command prompt on each device.

You need to configure a Group Policy Object (GPO) with the OneDrive settings required to redirect the Home folder of each user to Microsoft 365.

Before you can configure the Group Policy, you need to download the OneDrive Administrative Templates. These templates add the required OneDrive settings to Group Policy so you can configure the settings as required.

After the OneDrive settings have been configured in Group Policy, you can run the gpupdate /force command on the five computers to apply the new Group Policy settings immediately.

**QUESTION 3**

Your company has 10 offices.

The network contains an Active Directory domain named contoso.com. The domain contains 500 client computers. Each office is configured as a separate subnet. You discover that one of the offices has the following:

1.  
Computers that have several preinstalled applications
2.  
Computers that use nonstandard computer names
3.  
Computers that have Windows 10 preinstalled
4.  
Computers that are in a workgroup

You must configure the computers to meet the following corporate requirements:

1.  
All the computers must be joined to the domain.
2.  
All the computers must have computer names that use a prefix of CONTOSO.
3.  
All the computers must only have approved corporate applications installed.

You need to recommend a solution to redeploy the computers. The solution must minimize the deployment time.

- A. a provisioning package
- B. wipe and load refresh
- C. Windows Autopilot
- D. an in-place upgrade

Correct Answer: A

By using a provisioning package, IT administrators can create a self-contained package that contains all of the configuration, settings, and apps that need to be applied to a device. Incorrect Answers:

C: With Windows Autopilot the user can set up pre-configured devices without the need consult their IT administrator.

D: Use the In-Place Upgrade option when you want to keep all (or at least most) existing applications.

#### QUESTION 4

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. A user named User1 has files on a Windows 10 device as shown in the following table.

Name	Text in file
File1.docx	Importing and exporting is easy. For import, you need a source, and for export, you need a destination
File2.docx	You must declare what you want to import. Dangerous items cannot be imported. If you want to import valuables, you must pay customs.
File3.docx	IM are initials for instant messaging. You can use Microsoft Skype for IM, but there are also other IM programs.

In Azure Information Protection, you create a label named Label1 that is configured to apply automatically. Label1 is configured as shown in the following exhibit.

### Condition: Condition1

Default Directory - Azure Information Protection

Save

Discard

Delete

Choose the type of condition

Information Types  Custom

\* Name

✓

\* Match exact phrase or pattern

✓

Match as a regular expression

Off  On

Match with case sensitivity

Off  On

\* Maximum number of occurrences

Count occurrences with unique value only

Off  On

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

### Answer Area

Statements	Yes	No
Label1 applies to File1.docx.	<input type="radio"/>	<input type="radio"/>
Label1 applies to File2.docx.	<input type="radio"/>	<input type="radio"/>
Label1 applies to File3.docx.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

### Answer Area

Statements	Yes	No
Label1 applies to File1.docx.	<input type="radio"/>	<input checked="" type="radio"/>
Label1 applies to File2.docx.	<input checked="" type="radio"/>	<input type="radio"/>
Label1 applies to File3.docx.	<input type="radio"/>	<input checked="" type="radio"/>

The phrase to match is "im" and it is case sensitive. The phrase must also appear at least twice.

Box 1: No

File1.docx contain the word "import" once only

Box 2: Yes

File2.docx contains two occurrences of the word "import" as well as the word "imported"

Box 3: No

File3.docx contains "IM" but his is not the correct letter case.

### QUESTION 5

You have an on-premises Microsoft SharePoint Server 2016 environment.

You create a Microsoft 365 tenant.

You need to migrate some of the SharePoint sites to SharePoint Online. The solution must meet the following requirements:

1.  
Microsoft OneDrive sites must redirect users to online content.
2.  
Users must be able to follow both on-premises and cloud-based sites.
3.  
Users must have a single SharePoint profile for both on-premises and on the cloud.
4.  
When users search for a document by using keywords, the results must include online and on-premises results.

From the SharePoint Hybrid Configuration Wizard, you select the following features:

1.  
Hybrid business to business (B2B) sites
2.  
Hybrid OneDrive
3.  
Hybrid Search

Which two requirements are met by using the SharePoint Hybrid Configuration Wizard features? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Users must have a single SharePoint profile for both on-premises and on the cloud.
- B. OneDrive sites must redirect users to online content.
- C. Users must be able to follow both on-premises and cloud-based sites.
- D. When users search for a document by using keywords, the results must include online and on-premises results.

Correct Answer: BD

Hybrid OneDrive - Choosing this option will redirect on-premises My Sites/OneDrive for Business sites to SharePoint Online OneDrive for Business in Office 365. Once the wizard completes, any click of the OneDrive link from on-premises will redirect to OneDrive for Business in the cloud. This meets the following requirement: OneDrive sites must redirect users to online content.

Cloud hybrid search - Choosing this option creates a cloud Search service application in SharePoint Server and connects the cloud Search service application to your Office 365 tenant. This meets the following requirement: When users search for a document by using keywords, the results must include online and on-premises results.
