**QUESTION 1****HOTSPOT**

Your company uses Microsoft Cloud App Security.

You plan to integrate Cloud App Security and security information and event management (SIEM).

You need to deploy a SIEM agent on a server that runs Windows Server 2016.

What should you do? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer Area**

Statements	Yes	No
User1 can view Device1 in Windows Defender Security Center.	<input type="radio"/>	<input type="radio"/>
User2 can sign in to Windows Defender Security Center.	<input type="radio"/>	<input type="radio"/>
User3 can view Device1 in Windows Defender Security Center.	<input type="radio"/>	<input type="radio"/>

---

Correct Answer:

**Answer Area**

Statements	Yes	No
User1 can view Device1 in Windows Defender Security Center.	<input checked="" type="radio"/>	<input type="radio"/>
User2 can sign in to Windows Defender Security Center.	<input type="radio"/>	<input checked="" type="radio"/>
User3 can view Device1 in Windows Defender Security Center.	<input checked="" type="radio"/>	<input type="radio"/>

**QUESTION 2****DRAG DROP**

Your company purchases a cloud app named App1.

You need to ensure that you can use Microsoft Cloud App Security to block downloads in App1. App1 supports session controls.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions

to the answer area and arrange them in the correct order.

Select and Place:

### Actions

Deploy Azure Active Directory (Azure AD) Application Proxy.

From the Cloud App Security admin center, add an app connector.

Sign in to App1.

Create a conditional access policy.

From the Azure Active Directory admin center, configure the Diagnostic settings.

From the Azure Active Directory admin center, add an app registration for App1.

### Answer Area

Correct Answer:

### Actions

Deploy Azure Active Directory (Azure AD) Application Proxy.

From the Azure Active Directory admin center, configure the Diagnostic settings.

From the Azure Active Directory admin center, add an app registration for App1.

### Answer Area

From the Cloud App Security admin center, add an app connector.

Create a conditional access policy.

Sign in to App1.

### QUESTION 3

You have a Microsoft 365 tenant that contains a Windows 10 device named Device1 and the Microsoft Endpoint Manager policies shown in the following table.

Name	Type	Block execution of potentially obfuscated scripts (js/vbs/ps)
Policy1	Attack surface reduction (ASR)	Audit mode
Policy2	Microsoft Defender ATP Baseline	Disable
Policy3	Device configuration profile	Not configured

The policies are assigned to Device1.

Which policy settings will be applied to Device1?

- A. only the settings of Policy1
- B. only the settings of Policy2
- C. only the settings of Policy3
- D. no settings

Correct Answer: D

Attack surface reduction rules support a merger of settings from different policies, to create a superset of policy for each device. Only the settings that are not in conflict are merged, while those that are in conflict are not added to the superset of rules.

### QUESTION 4

#### HOTSPOT

You have a data loss prevention (DLP) policy.

You need to increase the likelihood that the DLP policy will apply to data that contains medical terms from the International Classification of Diseases (ICD-9-CM). The solution must minimize the number of false positives.

Which two settings should you modify? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

### QUESTION 5

You have a Microsoft 365 subscription.

From the Security and Compliance admin center, you create a content search of a mailbox.

You need to view the content of the mail messages found by the search as quickly as possible.

What should you select from the Content search settings?

- A. Export report
- B. Export results
- C. Re-run
- D. View results

Correct Answer: B

There is no "View Results" option. You can preview results but that will only show up to 100 emails. To guarantee you're getting all results, you'll need to export them to a PST file.
