## QUESTION 1

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the objects shown in the following table.

Name	Configuration
Group1	Global security group
User1	Enabled user account
User2	Disabled user account

You configure Azure AD Connect to sync contoso.com to Azure AD. Which objects will sync to Azure AD?

- A. Group1 only
- B. User1 and User2 only
- C. Group1 and User1 only
- D. Group1, User1, and User2

Correct Answer: D

**Disabled accounts** Disabled accounts are synchronized as well to Azure AD. Disabled accounts are common to represent resources in Exchange, for example conference rooms. The exception is users with a linked mailbox; as previously mentioned, these will never provision an account to Azure AD.

The assumption is that if a disabled user account is found, then we won't find another active account later and the object is provisioned to Azure AD with the userPrincipalName and sourceAnchor found. In case another active account will join to the same metaverse object, then its userPrincipalName and sourceAnchor will be used.

## QUESTION 2

Your network contains an on-premises Active Directory domain. The domain contains domain controllers that run Windows Server 2019. The functional level of the forest and the domain is Windows Server 2012 R2.

The domain contains 100 computers that run Windows 10 and a member server named Server1 that runs Windows Server 2012 R2.

You plan to use Server1 to manage the domain and to configure Windows 10 Group Policy settings.

You install the Group Policy Management Console (GPMC) on Server1.

You need to configure the Windows Update for Business Group Policy settings on Server1.

Solution: You upgrade Server1 to Windows Server 2019.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

---

### QUESTION 3

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains 1,000 Windows 10 devices.

You perform a proof of concept (PoC) deployment of Microsoft Defender for Endpoint for 10 test devices. During the onboarding process, you configure Microsoft Defender for Endpoint-related data to be stored in the United States.

You plan to onboard all the devices to Microsoft Defender for Endpoint.

You need to store the Microsoft Defender for Endpoint data in Europe.

What should you do first?

A. Delete the workspace.

B. Create a workspace.

C. Onboard a new device.

D. Offboard the test devices.

Correct Answer: B

Storage locations

Understand where Defender for Cloud stores data and how you can work with your data:

\* Machine information

-Stored in a Log Analytics workspace.

- You can use either the default Defender for Cloud workspace or a custom workspace. Data is stored in accordance with the workspace location.

### QUESTION 4

You have a Microsoft 365 tenant that contains 1,000 iOS devices enrolled in Microsoft Intune. You plan to purchase volume-purchased apps and deploy the apps to the devices. You need to track used licenses and manage the apps by using Intune. What should you use to purchase the apps?

- A. Microsoft Store for Business
- B. Apple Business Manager
- C. Apple iTunes Store
- D. Apple Configurator

Correct Answer: B

## QUESTION 5

### HOTSPOT

Your network contains an on-premises Active Directory domain and a Microsoft 365 subscription. The domain contains the users shown in the following table.

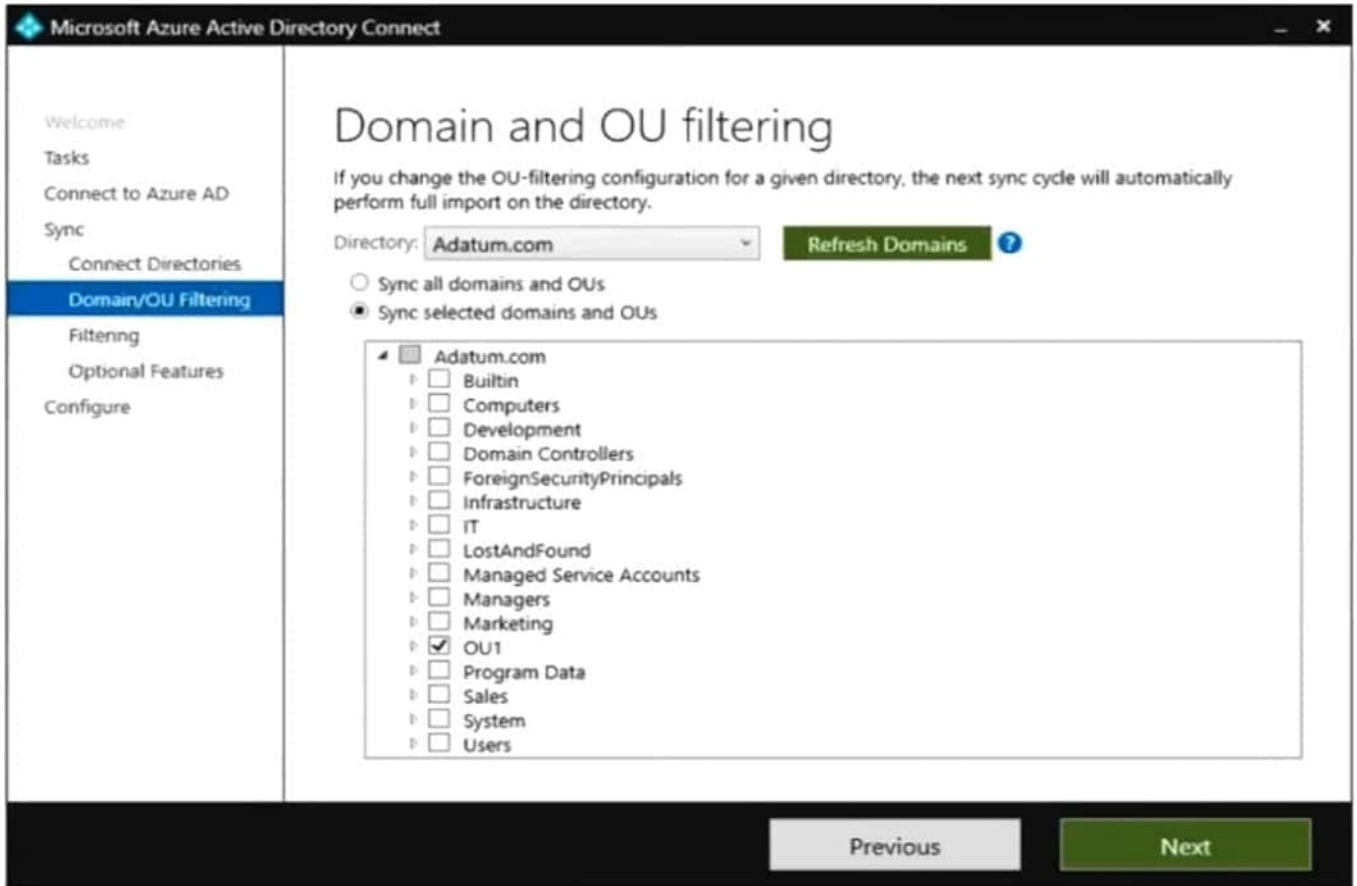

Name	Member of	In organizational unit (OU)
User1	Group1	OU1
User2	Group2	OU1

The domain contains the groups shown in the following table.

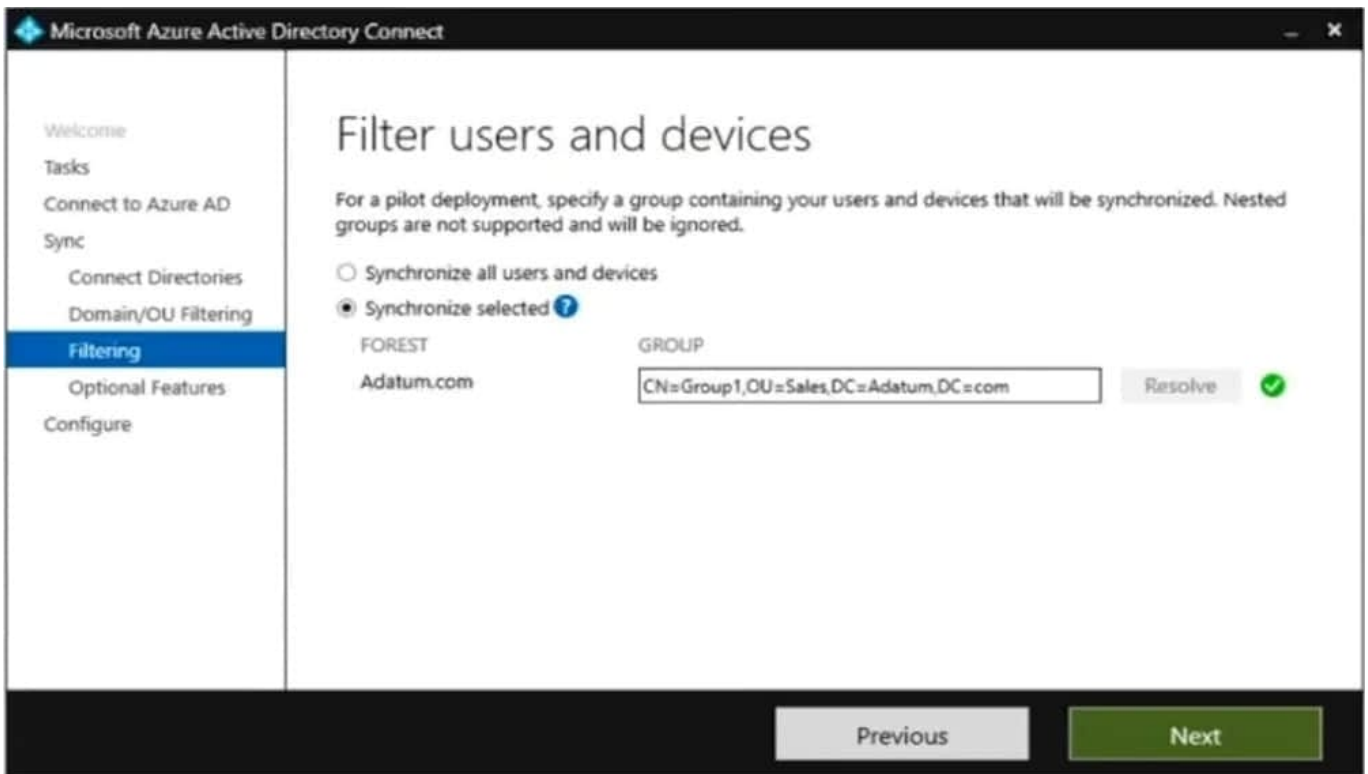

Name	Member of	In OU
Group1	<i>None</i>	Sales
Group2	Group1	OU1

You are deploying Azure AD Connect.

You configure Domain and OU filtering as shown in the following exhibit.

You configure Filter users and devices as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct

selection is worth one point.

Hot Area:

Statements	Yes	No
User1 syncs to Azure AD.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
User2 syncs to Azure AD.	<input type="checkbox"/>	<input type="checkbox"/>
Group2 syncs to Azure AD.	<input type="checkbox"/>	<input type="checkbox"/>

Correct Answer:

Statements	Yes	No
User1 syncs to Azure AD.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
User2 syncs to Azure AD.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Group2 syncs to Azure AD.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
